INTRODUCTORY OBSERVATIONS TO THE FIRST EDITION.

THAT regard for brevity which I have shown throughout this laborious, but, I trust, not useless Volume, will be evinced, as far as may be consistent with perspicuity, in my Introductory Observations. The plan of the Work, though novel, is simple; and its contents, though varied, are for the most part such as require little more than a recapitulation of their several heads: in short, if the utility of the design be not apparent, it would be unreasonable to expect that anything which might here be offered could render it so.

To discuss the nature or merits of one's own performances is, indeed, at all times dangerous, inasmuch as it is extremely difficult to say all that may be considered necessary, without incurring the charge of egotism; and, in truth, I feel so little desire for the kind of notoriety which Authorship confers, that did not experience convince me how injurious it has been to my interests to evade the literary responsibility attached to my own productions, how humble soever their character, "THE TREASURY OF KNOWLEDGE AND LIBRARY OF REFERENCE," in all probability, would either have been anonymously ushered into the world, or have appeared as the work of another.

To what extent I may carry a publication to which I have given so comprehensive a title, will naturally be determined by future contingencies; at present it is sufficient to observe, that no inconsiderable progress has been made in preparing suitable materials for a *Continuation*. But this volume is complete in itself, and, as far as it goes, is intended to supply a deficiency felt by all who have not access to good libraries, or whose means are too limited to purchase larger works of reference; while it is believed there are not a few who will consider that the unusual portability of a volume, in which so great a mass of useful matter is combined, is a desideratum for the youthful student. Judicious condensation has been my aim throughout; and, in endeavouring to avoid prolixity, I hope I have not been led into the opposite extreme: how far I have succeeded, the public, whose candour is seldom appealed to in vain, must decide. I will therefore no longer trespass on my circumscribed limits, than to make such concise observations as appear indispensable, in noticing the various contents of the work.

As the "*New and enlarged Dictionary of the English Language*" forms the main feature of Part I., my observations will properly commence with it; and, in so doing, I feel no hesitation in premising, that, if its size and price be considered, there is no publication with which it may not safely bear the closest comparison; for, independently of having introduced every well-authorized word which the largest Dictionaries contain, I have added, from the works of the most correct English writers of the present day, a numerous list of useful and significant words, the definitions of which I have never been able to meet with in any lexicographical work hitherto published. I feel it necessary to lay some stress upon this, because, although I court comparison, I am aware there are few persons who will take the trouble to ascertain the fact by making such comparison. But it is not merely the *number* of Words which a Dictionary may contain that gives to it a value. In the progress of literature, not only are new words introduced into every living language, but a modification, and oftentimes a total change, takes place in the meanings of many already in use; while some grow obsolete, and others, which once, perhaps, formed part of the

Introductory Observations.

phrasology of polished society, are destined at a subsequent period to be known only as *cant terms* or vulgar jargon. Upon this head so much might be said, that I find it difficult to confine my remarks to the brief limits I have prescribed for them. I can, however, assure the reader, that in the following pages this has been steadily kept in view.

On nothing connected with the principles of language is there so great a diversity as in the rules laid down by different Lexicographers for fixing a correct and uniform system of Spelling; and as few of them invariably abide by their own rules, it can excite no surprise that the want of uniformity and consistency is so apparent. Orthography is, in fact, too often subject to the caprices of authors or the arbitrary laws of fashion, to be governed for any great length of time on settled principles; and those who have noticed the verbal pedantry that may be discovered in one writer, or the affectation that may be seen in another (to say nothing of the great change that Orthography undergoes, as it were by common consent, in the lapse of a few generations) will readily subscribe to the truth of what I have advanced.

Whoever has devoted his time to the compilation of an English Dictionary, must confess how much he owes to the mental energy of that profound philologist who so pre-eminently overcame the difficulties by which he was surrounded; yet the preceding observations could be abundantly confirmed by a reference to his own erudite work. The laws of language are not immutable; and the most that can be done to insure their permanence, is to consult analogy and etymological precision, in order to preserve a consistent uniformity. The practice of the best writers of the present century has been decidedly at variance with many of Dr. Johnson's examples in Orthography: how useless, then, would it be to resist the popular current, unless, indeed, it had its source in manifest error, and was continued in violation of obvious propriety. Need I illustrate this remark by naming any other instance than the uniform exclusion of the letter *k*, in all such words as *critick*, *music*, *public*, &c.? Modern usage has decided the point, and all the pains which have been taken by the "improvers" of Johnson to perpetuate it, have proved useless and superogatory.

I may here remark, that notwithstanding I have inserted many scientific words, and others which are purely technical, it was impossible that the Volume could be rendered perfect in that particular; but I have reason to anticipate that far more terms of art will be found contained in it than could be well expected. Should I proceed with my design, an indulgent public will hereafter have to determine, how far a compendious vocabulary of such terms can be rendered compatible with practical utility.

Although this is not a "Pronouncing" Dictionary, according to the common acceptance of the term, it will perhaps be expected that, in the Introductory Observations, there should at least be some reference to English Orthography. I have endeavoured to give this subject all the attention its importance demands; and, in so doing, I have minutely examined those unsightly combinations of letters and figures, through the means of which a just pronounciation has been sought to be established. Far be it from me to wish to detract from the merits of any. No small degree of patience was necessary for such an undertaking; and I am ready to admit that much skill and ingenuity have been displayed in the various attempts. But, has the end in view been attained? With becoming diffidence, I hope, but certainly with a full conviction that I have judged rightly, I venture to affirm, that an absolute reliance on any of these systems must end in disappointment. By constant reference, or tedious dictation, such modes may somewhat facilitate orthoepical instruction; but even those who have pursued them with most advantage will find, that, instead of having obtained any *rational*

Introductory Observations.

guide for the correct pronunciation of words, they will often, very often, be left to the mere mechanical operation of the memory. In fact, I have never known an instance of Orthoepy having been studied in this way, in which the learner did not continually discover his own helplessness, as well as the imbecility of the system, either by his want of confidence when he met with a word with which he did not happen to be familiar, or by some ludicrous misconception of his "pronouncing" instructor. Dr. Johnson observes, that "most writers of English Grammars have given long tables of words pronounced otherwise than they are written; and seem not sufficiently to have considered, that, of English, as of all living tongues, there is a double pronunciation: one, cursory and colloquial; the other, regular and solemn. The cursory pronunciation is always vague and uncertain, being made different, in different mouths, by negligence, unskilfulness, or affectation. The solemn pronunciation, though by no means immutable and permanent, is yet always less remote from the orthography, and less liable to capricious innovation. They have, however, generally formed their tables according to the cursory speech of those with whom they happened to converse, and, concluding that the whole nation combines to vitiate language in one manner, have often established the jargon of the lowest of the people as the model of speech." For my own part, I consider that a correct pronunciation, like a polite address, is seldom thoroughly acquired without an intercourse with good society, or the advantage of having received instruction, in early life, from persons whose previous habits and studies qualified them for the task; and such, I presume, are the majority of those who undertake the education of respectable youth. As far as any assistance can be derived from a careful accentuation of the words, that assistance may be found here; the accentual mark being placed not merely on the emphatic syllable, but on the right letter of that syllable; and, where the use of the double accent would better explain the intention, it has been invariably adopted. [See also "Concise Directions" at the end of Part I.]

For a considerable time past I have been collecting and arranging materials for a philological work, in which more than ordinary attention will be paid to rhetorical accuracy, and, consequently, to the powers of letters in their various combinations; but I found it much too diffuse for my present purpose, and being unwilling to mutilate that which at some future period may appear in a complete form, I was glad to avail myself of the Compendium herein printed, which, under the title of "The Miniature English Grammar,"* has already received the approbation of discerning critics. The "English Verbal Distinctions," which follow, are, I trust, not less appropriate: the mode of classing them is both novel and discriminative: and I feel satisfied they will be well received by all who take the trouble to examine them.

Part II. commences with a *New Universal Gazetteer*; in which, I believe, all the information really necessary in a work of geographical reference will be found condensed. It cannot be expected that copious descriptions of every place could be given, but no important features have been omitted, nor has anything that could add to its usefulness been overlooked. Appended to the Gazetteer, are several *Statistical Tables*, which, together with *The List of Cities, Market-Towns, Boroughs, &c.* of the United Kingdom, have been derived from the best sources for accuracy, and cannot fail to be serviceable.

The *Compendious Classical Dictionary*, it will be seen, is far more comprehensive than the usual abridged accounts of the Heathen Deities; and, though

* Upon a close examination of the GRAMMAR, it was thought expedient to make some material additions and alterations in various parts. It is, consequently, rather less concise than before; but the Editor humbly presumes that the few additional pages add to the utility of the volume.

Introductory Observations.

it may not contain all that the *classical* reader might desire, will greatly assist those who have not larger works on the subject. Subjoined to this is a List of *Scripture Proper Names*, accented, which, particularly for youth, will also be found useful.

An *Analysis of General History* comes next. Instead of the usual method of recording the leading events of History, in chronological order, from the Creation downwards, I have arranged them alphabetically; thereby adapting it to the general character of the work, as one principally intended for reference; and condensing a vast quantity of matter into a small compass. It is worthy of remark, too, that although its confined limits precluded the possibility of making it complete as a work of reference to *Universal History*, yet it will materially serve that end, and be a perfect index to the principal occurrences in the history of our own country in particular.

The *Dictionary of Law Terms* was written by me for a former publication. I have now, however, made many additions to it; and I trust that *unprofessional* readers will become better acquainted with the meaning of legal terms and phrases by a perusal of this epitome, divested as it is of all technicalities, than if they even took the trouble to consult professional books. With respect to the various Tabular Addenda with which the work is concluded, I have only to hope that such have been selected as are most useful for general purposes.

And now, the *body* of the Work having passed, as it were, in brief review before me, I come to speak, though last not least, of the novel, and, as it may be thought, whimsical manner in which each page is garnished. If I had no other plea for its adoption than that of novelty, I should not, great as the attractions of novelty are, have felt myself justified in travelling out of the beaten path. But I make no scruple in owning, that I am so impressed with the value of those gems of wisdom which have been handed down to us in the form of apothegms, that I gladly seized an opportunity of enriching the pages of a book with them, which, unless I greatly overrate its qualities, will find its way into numerous schools and families, and, consequently, meet the eye of youthful readers. To them I would say, that I sincerely hope many of these brief lessons of experience may be engraven on the tablet of the memory, never to be erased. What are they but the golden remains of antiquity, or the treasures of modern wisdom?—copious in meaning, yet marked by elegant terseness; inculcating the precepts of worldly prudence, yet having a tendency to check vice, strengthen virtue, and lead the mind to a reliance on the Divine Will. We are, perhaps, not duly sensible, how much of whatever good may have marked our career is to be attributed to the influence of some pious, moral, or prudential maxim with which our youthful minds were imbued. Parents and teachers who appreciate this remark, will hail with satisfaction the opportunity presented by the following pages, of planting the seeds of wisdom in the minds of youth, hereafter to be expanded to a goodly harvest; for Proverbs, however quaintly expressed, contain the essence of some moral truth or practical lesson; they are drawn from real life, and are generally the fruit of philosophy grafted on the stem of experience. Indeed, although of late years neglected by most writers, they were formerly so greatly held in reverence, that scarcely a book appeared in which its author did not bear testimony to their value by the free use he made of them. Nay, we are told by Mr. D'Israeli, that “much later even than the reign of Elizabeth, our ancestors had proverbs always before them, on every thing which had room for a piece of advice on it. They had them painted on their tapestries, stamped on the most ordinary utensils, the blades of their knives, the borders of their plates, and ‘conned them out of goldsmiths’ rings.’” I know it may be objected, that proverbial sayings frequently contain gross allusions, and inculcate sentiments not always favourable to virtue: That is undeniable; and if I have not shown a due regard to the ex-

Introductory Observations.

clusion of such from this collection, I grant that I must be very ill qualified for the compilation of a work that is intended for all classes and all ages. I trust, however, that, though numerous, they are unexceptionable; and I will conclude my observations on aphoristic precepts in the quaint, but apposite, language of a writer of the seventeenth century: "They walk upon men's tongues, dance in their fancies, are carried about in their memories, and are reserved for graces of their discourses, when they desire to appear in their festival habits and holiday behaviour."*

I have now only to say a few words respecting the different descriptions of *Mottoes*, and to suggest a method or two relative to the manner in which they may be advantageously used in schools. Instead of the Aphorisms and Proverbs which elsewhere throughout the volume environ the subject matter, the "English Grammar," "Verbal Distinctions," and "Phrases," are surrounded by short sentences, intended as Exercises on Syntax and Style; each of which is repeated in a corrected form, and placed opposite, as a "Key" to the Exercise. The marginal spaces of the "English Dictionary" are occupied by Moral Maxims, *alphabetically arranged* throughout; from which vast stock, an almost inexhaustible supply of new *Lines for Writing Copies* are furnished, and some of the trite and oft-repeated sentences now in use may be discontinued. But it is not in this way only that they may be found useful: the judicious Teacher may form them into *Lessons* to be committed to memory; select from among them many which will serve as *Themes*; or use them in a variety of other ways, which his own experience will point out. — Selections from the Proverbs of all Nations decorate the pages of the "Gazetteer." They are in colloquial phraseology, and, of course, less formal and didactic, but not less apposite (if we regard their application to the every-day occurrences of life) than the moral sentences which garnish the pages of the "English Dictionary." — With the "Classical Dictionary" is commenced a series of *Latin Mottoes*, with free translations; and these, which I hope will not be less acceptable than the others, are continued till the "Dictionary of Law Terms" is begun; when a collection of Latin Sentences, recognised as fundamental maxims of British Law, are given, with English translations, and carried on to the end of the Volume. Thus it will be seen, that I have attended to something like method in the arrangement of this rather heterogeneous and formidable phalanx; but how they will be received, of what use they may be found, and whether the novelty will be regarded like many other novelties — as more adapted for ornament than use — I leave to the Public, at whose tribunal they will be judged, and to whose decision I shall bow with deference; hoping, ere long, again to appear before them with another volume of "The Treasury of Knowledge," &c., forming a NEW UNIVERSAL BIOGRAPHY.

SAMUEL MAUNDER.

* "I have seen it remarked," says Lord Eldon, in his *Anecdote Book*, "that something which in early youth captivates attention, influences future life in all stages. When I left school in 1766 to go to Oxford, I came up from Newcastle to London in a coach, then denominated, on account of its quick travelling, as travelling was then estimated, a 'fly,' being, as well as I remember, three or four days and nights on the road. There was no such velocity as to endanger overturning or other mischief. On the panels of the carriage were painted the words '*Sat cito, si sat bene*,' — words which made a most lasting impression on my mind, and have had their influence upon my conduct in all subsequent life. * * * In short, in all that I have had to do in future life, professional and judicial, I have always felt the effect of this early admonition on the panels of the vehicle which conveyed me from school, '*Sat cito, si sat bene*.'" — *Twiss's Life of Lord Eldon*.

TO THE SIXTH EDITION THE FOLLOWING WAS PREFIXED.

So well received was the first Edition of this Work, that on the appearance of the second the Proprietor had the gratification of being able to preface it with the following congratulatory sentence :—“ With scarcely one solitary advertisement to assist the sale, the whole of a large impression of *THE TREASURY OF KNOWLEDGE* has been purchased by the Public in the space of three months ; and at this moment several hundred copies are required of *this* Edition, to execute orders given for the *first*.” He at the same time justly attributed “ the eager demand manifested for it ” to “ the highly favourable reception given to it by every Reviewer under whose notice it had come.” And he further remarked, that, “ independently of the publicly-expressed opinions of the critical bench, he had been honoured by many private testimonies, every way flattering to his undertaking — some accompanied by ingenious observations and recommendatory hints, and others replete with unqualified praise ; ” while he assured “ his liberal judges and patrons (among whom were several conductors of eminent Schools, whose good opinion was rendered the more valuable by its being the result of arduous professional experience), that he was resolved to pay the most sedulous attention to its improvement, in order to have that claim on their support in future, which is ever awarded to those who diligently strive to maintain it.”

Since that period the Author has endeavoured to redeem his pledge, by devoting considerable time and attention to the revision of every portion of this volume ; and he now, with increased confidence, presumes to hope that his labour has not been thrown away. — After consulting numerous philological and scientific publications, and diligently collating them with the works which had previously been examined, he has been enabled to *add* upwards of *TEN THOUSAND* “ useful, significant, and well-authorized words ” (with definitions as perspicuous as their indispensable conciseness would admit of) to the “ *ENLARGED ENGLISH DICTIONARY* ” in Part I. ; thereby rendering it the most copious Vocabulary of the English language extant — not merely in comparison with others of a corresponding size, but with any Dictionary of six times its bulk and price. *How* he has performed his task, others must determine ; — for *him* to say more on the subject might be deemed offensive egotism ; — to say less would, he thinks, be a mere *affectation* of modesty. He trusts, however, he shall not be charged with either ; yet he must confess, (if he may be allowed to apply to the writers of prefaces a trite, though classical, simile), that while endeavouring to steer clear of the whirlpool of Charybdis, none are in more imminent danger of being wrecked on the rock of Scylla.

If, by a happy method of condensation, the Author has been enabled to send forth “ a book remarkable for the mass of useful information it contains,” and, while doing so, has shown a laudable desire to engraft virtuous principles on human acquisitions, his chief aim has been answered. The pressing calls of business or of duty deprive many of the means of pursuing literature or science, in any better way than by desultory reading, aided by books of reference ; and he who claims the parentage of this volume is not one who disdains the humble efforts of the intellect, or despises the rudest stepping-stones to learning ; being convinced that every advance, however trifling, which the mind makes towards attaining perfection, increases the rational enjoyments of life. Nor is he singular in his opinion. “ Ignorance,” says the author of *Rasselas*, “ is mere privation, by which nothing can be produced : it is a vanity in which the soul sits motionless and torpid for want of attraction : and, without knowing why, we always rejoice when we learn, and grieve when we forget.” — And an eminent poet, whose knowledge of general literature is on a par with his manly and harmonious verse, has made the following judicious remarks ; * —

* Vide the Inaugural Speech of the late Mr. Thomas Campbell (April 12, 1827), on his having been chosen lord rector of the University of Glasgow.

Introductory Observations.

"In comparing small learned acquisitions with none at all, it appears to me to be equally absurd to consider a little learning valueless, or even dangerous, as some will have it, as to talk of a little virtue, a little wealth, or health, or cheerfulness, or a little of any other blessing under heaven, being worthless or dangerous.

"To abjure any degree of information, because we cannot grasp the whole circle of the sciences, or sound the depths of erudition, appears to be just about as sensible as if we were to shut up our windows because they are too narrow, or because the glass has not the magnifying power of a telescope.

"For the smallest quantity of knowledge that a man can acquire, he is bound to be contentedly thankful, provided his fate shuts him out from the power of acquiring a larger portion — but whilst the possibility of farther advancement remains, be as proudly discontented as ye will with a little learning. For the value of knowledge is like that of a diamond, it increases according to its magnitude, even much more than in a geometrical ratio. — One science and literary pursuit throws light upon another, and there is a connection, as Cicero remarks, among them all —

"*'Omnes artes, quæ ad humanitatem pertinent, habent quoddam commune vinculum; et quasi cognatione quadam inter se continentur.'*"

The force of the foregoing extract would be weakened by any additional remarks; but the following lines may, perhaps, be allowed to stand in lieu of a more appropriate conclusion:—

Where'er the rays of Science cheer mankind,
Or Learning's hallowed light illumines the mind,
There Knowledge pours her countless treasures forth,
And points to Wisdom, Honour, Fame, and Worth;
There splendid talents proud distinction claim,
There Genius earns a never-dying name,
Virtue asserts her power, and Merit tries
No more in vain to bear away the prize;
For Truth and Justice there with Freedom reign,
And modest Merit follows in their train.

March, 1831.

ADVERTISEMENT TO THE SIXTEENTH EDITION.

SINCE the above was written, *nine* large Editions of "The Treasury of Knowledge" have been issued — which, while it affords the best proof that the kind greeting given to the Work on its first appearance was not undeserved, has encouraged the Author to endeavour to render it still more worthy of the public favour.* Until lately, his time has been fully occupied in producing (as parts of one uniform series, yet quite independent of each other), "The Biographical Treasury," "The Literary and Scientific Treasury," and the "Treasury of History;" which, as they severally appeared, were honoured with flattering notices from various members of the critical corps; many of whom generously seized the opportunity to reiterate their former commendations of *this highly-favoured volume*. To them, therefore, for the uniformly handsome manner in which they have commented on his labours — and to a liberal Public, for the patronage they have as uniformly bestowed on them — he once more returns his most grateful acknowledgments.

Dec. 1844.

* By re-modelling and considerably extending *The New Universal Gazetteer*, by introducing a *Synoptical View of the Peerage*, and by sundry other additions and emendations.

A

COMPENDIOUS ENGLISH GRAMMAR;

TO WHICH ARE ADDED,

Verbal Distinctions, partially illustrated:

The whole garnished with

BRIEF EXAMPLES, AS MISCELLANEOUS EXERCISES ON SYNTAX AND STYLE.

"To know Latin and Greek, is a great intellectual luxury; but to know one's own language, is almost an intellectual necessity" [necessary]. — *Bulwer*.

ENGLISH Grammar is the art of speaking and writing the English language with propriety.

It consists of four parts; *Orthography*, *Etymology*, *Syntax*, and *Prosody*.

Orthography teaches the nature and power of letters, and the correct spelling of words.

Etymology treats of the several kinds of words.

Syntax treats of the construction of sentences.

Prosody, of pronunciation and poetry.

But the most useful parts are *Etymology* and *Syntax*; and to these this short treatise is confined.

ETYMOLOGY.

The words, or parts of speech, that constitute the English language, are the *Article*, *Noun*, *Adjective*, *Pronoun*, *Relative*, *Verb*, *Participle*, *Auxiliary*, *Adverb*, *Preposition*, *Conjunction*, and *Interjection*.

OF THE ARTICLE.

The article is prefixed to nouns, to limit or determine their meaning; as, "a strait, an isthmus, the ocean."

There are three articles; *a*, *an*, and *the*.

A and *an* are named *indefinite*, because they denote some one thing of a kind; as "a wren, an eagle."

The is named *definite*, because it points out some particular thing; as, "the book, the world."

OF THE NOUN.

A noun is the name of any thing in existence, or of which we can form an idea; as, "health, happiness, globe, telescope."

Nouns are of two kinds, *proper* and *common*.

Proper nouns are the names of persons, places, &c.; as "Adam, Eden, Nile, Egypt."

Common nouns are all other names; and may be subdivided into *substantive* and *abstract*; *substantive*, or names of things substantial, as "camels, cedar, amethyst;" *abstract*, or names characterized by some quality, as "lightness, velocity, content."

A noun is known by its either admitting an article before it, as "a star, the sky;" or making sense without, as in "youth, beauty."

Nouns have the properties of *gender*, *number*, and *case*."

They have four genders; *masculine*, *feminine*, *common*, and *neuter*.

The *masculine* gender denotes animals of the *male* kind, as "boy, tiger."

The *feminine* denotes animals of the *female* kind, as "girl, tigress."

The *common* denotes those to which either *masculine* or *feminine* is applicable; as "guardian, ward, cousin, lamb, elephant."

The *neuter* denotes lifeless objects; as "wisdom, wealth."

Gender is distinguished in three ways:—

1. By different words; as, "boy, girl; husband, wife; father, mother; son, daughter; uncle, aunt; nephew, niece."

2. By a different termination; as "heir, heiress; benefactor, benefactress; hero, heroine; testator, testatrix."

3. By a noun, a pronoun, or an adjective, prefixed to the noun; as, "a man-servant, a maid-servant; a he-ass, a she-ass; a male child, a female child."

1. "Sometimes, however, by a figure in rhetoric, called *personification*, we assign sex to things inanimate. Thus, instead of 'it (the moon) rises,' we say, 'she rises; instead of 'it (death) advances with hasty steps,' we say, 'he advances.'

"This mode of expression, by which we give life and sex to things inanimate, forms a striking beauty in our language, rendering it in this respect superior to the languages of Greece and Rome, neither of which admitted this animated phraseology." — *Crombie*.

2. "The *masculine* term has a general meaning, expressing both male and female; and is always employed when the office, occupation, profession, &c., and not the sex, of the individual is chiefly to be expressed; and the *feminine* term is used in those cases only, in which discrimination of sex is indispensable. Thus:— If I say, 'The poets of this age are distinguished more by correctness of taste, than sublimity of conception,' I clearly include in the term *poets*, both male and female writers of poetry. If I say, 'She is the best poetess in this country,' I assign her the

EX. — IT IS NO USE ATTEMPTING TO LEARN GRAMMAR, WITHOUT WE ATTEND TO ITS RULES.

KEY. — TO ATTEMPT TO LEARN GRAMMAR IS OF NO USE, UNLESS WE ATTEND TO ITS RULES.

A Compendious English Grammar.

superiority over those only of her own sex. If I say, 'She is the best poet in this country,' I pronounce her superior to all other writers of poetry, both male and female. When distinction of sex is necessary for the sake of perspicuity, or where the sex is the primary object, the feminine noun must be employed to express the female: thus, 'I hear that some *authorresses* are engaged in that work.' Here the feminine term is indispensable."—*Crombie*.

Nouns have two numbers; the *singular* and the *plural*.

The *singular* expresses only one object; as, "a scholar, a preceptor."

The *plural* expresses two objects or more; as, "scholars, preceptors."

Some nouns have only a singular number; as, "gold, silver, utility, worth."

Some singular nouns are made plural, to express varieties of the same things; as, cloth, oil, sugar, tea, wine, &c.

Some nouns have only a plural number; as, alms, ashes, dregs, cates, folk, luigs, optics, pinchers, pulse (esculent seeds), regalia, riches.

Some nouns are alike in both numbers; as, apparatus, census, corps, deer, sheep.

And some, when used in a plural sense, do not take a plural form; as, audience, commonalty, divan, laity, populace, retinue.

3. Proper names, when used either figuratively to express eminence or distinction, or to denote two or more persons of the same name, admit the plural number; as, "Every nation has its *Hectors, Cæsars, and Alexanders; Solomons, Ciceros, and Lucretius.*"

The plural number is usually formed by adding *s* to the singular; as *vista, vistas; shrub, shrubs; alley, alleys.*

But when the noun ends in *ch* soft, *s, sh, ss, or x*, the plural is formed by adding *es*; as, *peach, peaches; bolus, boluses; fish, fishes; glass, glasses; box, boxes.* If the noun ends in *ch* hard, the addition of *s* only forms the plural; as, *loch, lochs; monarch, monarchs.*

Nouns ending in *o* preceded by a vowel, have only *s* added to form the plural; as, *cameo, numcio, ratio.* If preceded by a consonant, they sometimes have *es* added, as in *buffalo, cargo, volcano*; and sometimes only *s*, as in *portico, solo, rotundo.*

The nouns *beef, calf, corf, elf, half, loaf, loaf, self, sheaf, shelf, thief, wolf, life, knife, and wife*, change the *f* and *fe* into *ves*; as, *beef, heeves; elf, elves; knife, knives, &c.; staff* makes *staves*; all other nouns ending in *f, fe, or ff*, have only *s* added.

Nouns ending in *y* preceded by a consonant, change the *y* for *ies*; as, *ally, allies*;—those ending in *y* preceded by a vowel, follow the general rule; as, *valley, valleys.*

The plurals of some nouns are irregular:—*man* makes *men*; *woman, women*; *child, children*; *die* (a small cube), *dice*; *foot, feet*; *goose, geese*; *louse, lice*; *mouse, mice*; *ox, oxen*; *penny, pence*; *tooth, teeth.*

4. "Two or more nouns in concordance, and forming one complex name, or a name and a title, have the plural termination annexed to the last only," as, "the two *Miss Thomsons.*"—"Analogy," Dr. Priestley observes, "would plead in favour of another construction, and lead us to say, 'the two *Misses Thomson*;' for, if the ellipsis were supplied, we should say the two young ladies of the name of Thomson. The latter form of expression, it is true, occasionally occurs; but general usage, and, I think, analogy likewise, decides in favour of the former; for, with a few exceptions, and these not parallel to the examples now given, we almost uniformly, in complex names, confine the inflection to the last noun."—*Crombie*. Thus, "In the holes and corners where nature keeps her curiosities, there may be *Wrens and Luigo Joneses.*"—"The Transatlantic *Sir John Stuaclairs* are yet in *ovo.*" By analogy, we ought to say *man-traps, mouse-traps, queen-consorts, lord-chancellors, &c.*

5. In speaking of a family individually, adding the plural termination to the name is inadmissible; and instead of *Mr., Mrs., and the two Miss Lawsons*, we ought to say, either, *Mr., Mrs., and the two Misses Lawson*, or *Mr. and Mrs. Lawson and the two Miss Lawsons*; thus making the name strictly applicable to each individual.

6. Names of titles formed of a noun and an adjective require the inflection on the first word: as *attorneys-general, knights-errant, courts-martial.*

7. The proper plurals of the words *spoonful, mouthful*, and such like, are *spoonfuls, mouthfuls*, and not *spoonsfull, mouthsfull*; between which and the preceding there is an essential difference: thus, "Two large *spoonfuls* of this mixture to be taken," implies, that twice the quantity a spoon will hold is to be taken; but "Two large *spoonsfull* of this mixture to be taken," may intimate, that the *spoons* also are to be taken.

8. The words *means, news, and pains*, are used both as singular and plural nouns.

"As a general rule for the use of *means* as either singular or plural, it might render the construction less vague, and the expression therefore less ambiguous, were we to employ it as singular, when the mediation or instrumentality of one thing is implied; and as plural, when two or more mediating causes are referred to. 'He was careful to observe what *means* were employed by his adversaries to counteract his schemes.' Here *means* is properly joined with a plural verb; several methods of counteraction being signified. 'There is not a more effectual *means* to awaken in us an ambition raised above low pursuits, than to value ourselves as heirs of eternity.' Here the instrumentality of only one thing is implied, and the noun is therefore used as singular.

"*News* is far more generally used as a singular noun; but the rule just now recommended might, perhaps, be useful here also.

"In regard to *pains*, modern usage seems

to incline to the use of it as a plural noun."
—Crombie.

9. "There are cases in which no change is made to denote plurality ;" as in *stone* (14lbs. weight), *sail* (meaning *ships*), *head* (*cattle*), *stand* (applied to *arms*), *foot* (to *infantry*), *horse* (to *cavalry*) ; *brace*, *dozen*, *hundred*, *thousand*, &c. : "and though the neglect of the plural termination is ungrammatical, it probably savours less of vulgarity to go thus far with the multitude, than of pedantry to quit the beaten track."—*Systematic Education*.

The following nouns, chiefly from the dead languages, retain generally their original plurals ; those marked *n* have the English plural also :—

<i>Singular.</i>	<i>Plural.</i>
Amanuensis,	amanuenses.
Amphibium,	amphibia.

A Compendious English Grammar.

Nouns have three cases; the *nominative*, the *possessive*, and the *objective*.

Case is that circumstance in which a noun or a pronoun is placed with relation to some verb, preposition, pronoun, or other noun, in the same sentence.

The *nominative* case simply expresses the name of a thing, and is the subject of the verb; as, "The eye infinitely surpasses all the works of human industry."

The *possessive* expresses the relation of property or possession; and, in nouns in the singular number, is formed by adding to them the letter *s* preceded by an apostrophe; as, "The days of winter are those of nature's rest;" or, if they end in *s*, *nce*, or *ss*, by adding only the apostrophe; as, "High on Parnassus' top; Ulysses' queen; for goodness' sake; experience' self shall aid thy lame belief."

In nouns in the plural ending in *s*, the possessive is formed by adding an apostrophe only; as "Studios of peace, their neighbours' and their own."

The *objective* case generally follows transitive verbs and participles, and prepositions; as, "Set your affections on things above;" "Redeeming the time."

Nouns are thus declined:—

	<i>Sing.</i>	<i>Plu.</i>
<i>Nominative case,</i>	Man	Men.
<i>Possessive,</i>	Man's	Men's.
<i>Objective,</i>	Man	Men.
<i>Nominative case,</i>	A Parent	Parents.
<i>Possessive,</i>	A Parent's	Parents'.
<i>Objective,</i>	A Parent	Parents.

OF THE ADJECTIVE.

The adjective is a word added to nouns, to point out their properties, kinds, or qualities; as, "A good name is preferable to great riches;" "No pursuit is more delightful, or more diversified, than the attentive contemplation of nature."

The only change it undergoes (besides that of number, which applies chiefly to demonstrative adjectives) is on account of comparison, of which there are three degrees: *positive*, *comparative*, and *superlative*.

The *positive* is the simple form of the adjective, and expresses the quality of an object; as, *pure*, *bright*.

1. The termination *ish*, by its lessening the signification of the *positive*, may be deemed a degree of comparison; as, *damp*, *dampish*, or *rather damp*. *Ish* and *rather*, having the same import, ought not to occur in the same sentence.

The *comparative* expresses an increase or a decrease of the quality; as, *purer*, *brighter*, *less pure*, *less bright*.

2. "It has been questioned, whether *prior*, *superior*, and several others, which have the form of the Latin comparative, should be deemed comparatives. I think they ought not, for these reasons; first, they have not the form of the English comparative; secondly, they are never followed by *than*, which uniformly accompanies the English comparative; thirdly, it is not to be conceived, that every ad-

jective which implies comparison is therefore a comparative, otherwise *preferable*, (better than), *previous* (prior to), might be deemed comparatives; and fourthly, many of these have truly a positive meaning. The *interior* means simply the *inside*, as opposed to the *exterior* or *outside*; the *anterior*, the one before, opposed to *posterior*, the one behind."—Crombie.

3. When two comparative adjectives come together, one compared by *more* or *most*, and the other by *er* or *est*, the adjective compared by *er* or *est* should be placed first. "Mr. Halleck, one of the *most popular* and *sweetest* bards of America, is about to give the world a new poem." Properly, "*sweetest* and *most popular*;" or "the *most popular* and the *sweetest* bard."

4. When only two persons or things are spoken of comparatively, to use the *superlative* is improper. "And which is *best*?" replied Mentor, "a superb city, with a sterile and neglected country; or a country in high culture, and fruitful as a garden, with a city where decency has taken place of pomp." It ought to have been, "and which is *better*?"

The *superlative* expresses the greatest increase or decrease of the quality; as, *purest*, *brightest*, *least pure*, *least bright*.

5. "Adjectives whose signification does not admit intension or remission, cannot be compared. Among these are to be reckoned all words expressive of figure, as, *circular*, *square*, *triangular*, *straight*, *perpendicular*; for it is obvious, that if a body or a figure be triangular, or square, or circular, it cannot be more or less so. It is either circular or not circular, triangular or not triangular."—Crombie.

6. Some adjectives have an innate superlative meaning, and ought not to have the superlative term superadded; they will not admit any kind or degree of comparison; and they exclude all intensive words: such are *chief*, *complete*, *endless*, *entire*, *extreme*, *impossible*, *infallible*, *infinite*, *paramount*, *perfect*, *right*, *supreme*, *total*, *universal*. The following sentences are consequently incorrect: "The *chiefest* among ten thousand; The *completest* piece of mechanism ever exhibited; *How endless* is thy love! *Very entire*; Far as the earth's *extremest* bounds; *How impossible* it is to meet the wishes of all minds! *How infinite* are the works of God! *How perfect* in design! *No totally* inconsistent with justice; Fire is a *very universal* agent in perfecting the arts, and contributing to the comforts of life."

Adjectives of only one syllable are usually compared by adding *r* or *er*, and *st* or *est*; as *pure*, *purer*, *purest*; *bright*, *brighter*, *brightest*.

Adjectives of more syllables than one, are for the most part compared by *more* and *most* or *very*; or *less* and *least*; as, *careful*, *more careful*, *most* or *very careful*; *less careful*, *least careful*. Dissyllables ending in *y*, as *lovely*; in *le* after a consonant, as *ample*; or accented on the latter syllable, as *polite*; easily admit *er* and *est*; as, *lovelier*, *loveliest*; *ampler*, *amplest*; *politer*, *politest*.

In some words the superlative is formed by adding the adverb *most* to the end of them; as, *foremost, hindmost, uttermost*.

Some adjectives are compared irregularly; as, *good, better, best; bad, worse, worst; little, less, least; much or many, more, most; near, nearer, nearest or next; late, later, latest or last; old, older or elder, oldest or eldest*.

Demonstrative or definitive adjectives point out precisely the things to which they relate: *this* and *that*, with their plurals *these* and *those*, *former* and *latter*, and sometimes the indefinite adjectives *one* and *other*, are of this denomination.

"Body and soul must part:

This wings its way to heaven;

That drops into the grave."

"Warnings point out our danger; guano-
mous, time:

As *these* are useless when the sun is set,
So *those*, but when more glorious reason
shines."

"Homer was the greater genius, Virgil the better artist: in the *one* we admire the man; in the *other*, the work. The *former* hurries us with a commanding impetuosity; the *latter* leads us with an attractive majesty."

Indefinite adjectives express their subjects in a general or indeterminate manner. Of this kind are *some, other, any, one, all, such*.

Of these, only *one* and *other* admit being varied; *one* takes the possessive case, as *one, one's*; and *other* is declined thus:—

<i>Nom. case,</i>	<i>Sing.</i>	<i>Other,</i>	<i>Plu.</i>	<i>Others.</i>
<i>Possessive,</i>		<i>Other's,</i>		<i>Others'.</i>
<i>Objective,</i>		<i>Other,</i>		<i>Others.</i>

The plural *others* represents the adjective and the noun; thus, "Charity conceals the faults and infirmities of *others*" — *other persons*.

Distributive adjectives denote several persons or things individually: they are *each, every, either, and neither*.

Each and *every* refer singly to all the persons or things of any number; as, "Each heart despoil'd of *every* joy, would still on hope rely."

Either implies one or the other of two only; "We hold, O king! in one hand the sword, an olive branch in the other; peace and war;—choose *either*."

Neither means not *either*. "The princess asserted her resolve to live and die with one to whom she was bound by honour and duty: and whom *neither* would permit her to abandon."

Numeral adjectives are either *cardinal*, as *two, three*; or *ordinal*, as *second, third*.

Pronominal adjectives relate to possession or property: they are *my, thy, her, our, your, their*; from the pronouns *I, thou, she, it*.

OF THE PRONOUN.

The pronoun is used instead of a noun, to prevent a too frequent repetition of it; as, "Take fast hold of instruction: keep *her*, for *she* is thy life." "And Joseph

knew *his* brethren, but *they* knew not *him*." "We take no note of time, but from *its* loss."

1. This is the peculiar use of the pronoun; but we often see the pronouns *he* and *him, they* and *them*, without any noun for them to represent; thus, "Blessed is *he* that considereth the poor and needy." "*He* that is slow to anger is better than the mighty." "Let *him* that giveth, do it with simplicity; *him* that ruleth, with diligence; *him* that showeth mercy, with cheerfulness." "*Them* that honour me, I will honour, and *they* that despise me, shall be lightly esteemed." The singular pronoun has in such cases gained, as it were by prescription, a right of usage which it would be inconvenient to disturb. Not so, the plural pronoun; and the last preceding example would be perfectly correct, only if expressed thus: "Those that honour me; *those* that despise me;" the word *persons* being understood after *those*.

2. Mr. Lindley Murray says, "We frequently meet with *those* instead of *they* at the beginning of a sentence, and where there is no particular reference to an antecedent; as, '*Those* that sow in tears, sometimes reap in joy.'" Now demonstrative adjective pronouns (as Mr. Murray incorrectly calls them) do not always refer to an antecedent; they refer often to something subsequent, as in this very example.

In his eighth rule of Syntax, Mr. Murray says, "Every adjective, and every adjective pronoun, belongs to a substantive expressed or understood; as, 'Few are happy,' that is, '*persons*.'" According to Mr. Murray, "*those*" is an adjective pronoun; therefore "*those*" belongs to a substantive expressed or understood; and in the example, "*those* that sow in tears" belongs indubitably to the substantive *persons* understood. "It is not, however, always easy," adds Mr. Murray, "to say whether a personal pronoun or a demonstrative is preferable in certain constructions. 'We are not unacquainted with the calumny of *them* [or *those*] who openly make use of the warmest professions.'" I should say, without hesitation, "the calumny of *those*" is preferable.

"*They*," says Mr. Lennie (*Eng. Gram.* p. 45.), "stands for a noun already introduced, and should never be used till the noun be mentioned. *Those*, on the contrary, points out a noun not previously introduced, but generally understood. It is improper, therefore, to say, '*They* that are truly good must be happy.' We should say, *those* that are truly good; because we are pointing out a particular class of persons, and not referring to nouns previously introduced. A noun, when not expressed after *this, that, these*, and *those*, is always understood."

The pronouns are, *I, thou, he, she, it; we, ye* or *you*, and *they*.

The properties of pronouns are, *number, person, gender*, and *case*.

Pronouns have two numbers, the singular and the plural; and three persons in each.

A Compendious English Grammar.

The persons of the *singular* number are, *I*, the first; *thou* or *you*, the second; and *he, she, and it*, the third.

The persons of the *plural* number are, *we*, the first; *ye* or *you*, the second; and *they*, the third.

The *first* person is the person that *speaks*; the *second*, the person *spoken to*; and the *third*, the person or thing *spoken of*.

Their genders are distinguished thus:—

He is *masculine*; *she* is *feminine*; *it* is *neuter*; *I, thou, we, and ye* or *you*, are *common*; and *they* is *masculine, feminine, common, and neuter*.

They have three cases, and are thus declined:—

Pers.	Case.	Singular.	Plural.
1st.	Nom.	I.	We.
	Poss.	Mine.	Ours.
	Obj.	Me.	Us.
2d.	Nom.	Thou or you.	Ye or you.
	Poss.	Thine or yours.	Yours.
	Obj.	Thee or you.	You.
3d.	Nom.	He, she, it.	They.
	Poss.	His, hers, its.	Theirs.
	Obj.	Him, her, it.	Them.

The possessive cases *mine, thine, hers, ours, yours, and theirs*, represent the pronominal adjective and the noun; as, "Tis Providence alone secures, in every change, both *mine* and *yours*;" — *my life, &c.*

A *reciprocal* pronoun is formed by prefixing a pronominal adjective, or a pronoun in the objective case, to the noun *self* or *selves*; as, *myself, thyself, himself, itself, ourselves, themselves*. *Ourself* is peculiar to the royal style. "Witness *Ourself* at Westminster."

OF THE RELATIVE.

The relative is a conjunctive pronoun, and refers to some preceding noun or pronoun, called its *antecedent*; as, "He preaches well *who* lives well."

"Vain, very vain, my weary search to find That bliss *which* centres only in the mind."

The relatives are, *who, which, that, what, and whether*; though the last is almost obsolete, *which* being generally used instead.

Who is applied exclusively to persons; *which*, mostly to brutes and things inanimate; and *whether* to them all; as, "How benevolent is God, *who* never forsakes the creatures *which* his hands have made."

That, as a relative, is used to prevent the too frequent repetition of *who* and *which*; as, "He *who* has good health is young; and he is rich *that* good nothing." "Air, *which* all living creatures respire, is a subtle fluid *that* surrounds our globe."

What is a compound relative, including the antecedent as well as the relative; and means that *which* or *those which*; as, "So slow the growth of *what* is excellent!"

Who, which, and what agree with nouns in both numbers; and when used in asking questions, are called *interrogatives*; as, "But *who* can paint the lover as he

stood?" "*Which* is the great commandment in the law?" "Take no thought, saying, *What* shall we eat? or *what* shall we drink?"

Who and *which* admit of inflection; that is, change of form or of termination, and are thus declined:—

Singular and Plural.	
Nominative,	Who, Which.
Possessive,	Whose, Whose.
Objective,	Whom, Which.

OF THE VERB.

The verb is the principal word in a sentence; it expresses our thoughts and actions, and how we "live, move, and have our being;" as, "He *who* *promises* and *delays*, *loses* his thanks." "Time, with all its celerity, *moves* slowly on to him, whose whole employment is to *watch* its flight."

Verbs are of two kinds, *transitive* or *active*, and *intransitive* or *neuter*; and these are divided into *regular, irregular, and defective*.

1. What Mr. L. Murray and many others call *passive* verbs, we consider as verbs *transitive* in the *passive* voice.

If a verb will admit the objective case of a pronoun after it, as in "Educate *him* well," it is *transitive*. Intransitive verbs, generally, do not admit an objective case after them. "And the men *rose* up, and *went* down to Egypt, and *stood* before Joseph." Here *rose, went, and stood* are *intransitive*.

The properties of the verb transitive are, *voice, mode, tense, number, and person*.

The properties of the verb intransitive are the same, with the exception of *voice*, which belongs to verbs *transitive* only.

Verbs have two numbers, the singular and the plural; and three persons in each.

Voice is the *active* or *passive expression* of a verb *transitive*; — the *active* voice expresses *action* or *agency*; thus, "Hope is one of the choicest gifts which Heaven bestows on man." The *passive* voice denotes a *being acted upon*, and is formed by the past participle of a transitive verb, and an inflection of the auxiliary *be*; thus, "He that tilleth his land *shall be satisfied* with bread."

Mode is a particular form of the verb, showing the manner in which any thing we think, say, or do, is represented.

There are five modes: the *indicative*, the *imperative*, the *potential*, the *subjunctive*, and the *infinitive*.

The *indicative* simply asserts; as, "The moon *revolves* round the earth, and *accompanies* it in its revolution round the sun;" — or it asks a question; as, "Who *guides* the migratory swallows' flight?"

The *imperative* commands, exhorts, &c.; as, "*Abhor* that which is evil, *cleave* to that which is good." "*Know* thyself." "His blood *be* on us, and on our children!"

The *potential* implies possibility, probability, permission, will, and obligation;

as, "I could a tale unfold, whose lightest word would harrow-up thy soul." "He may come." "You must wait." "I can stay."

The *subjunctive*. The criteria of this grammatical stumbling-block are, its requiring the presence of another verb to form complete sense, its being preceded by a conjunction, its requiring the second and third persons singular to be the same as the first, and its expressing future time without the aid of an auxiliary: thus, "Withdraw thy foot from thy neighbour's house, lest thou weary him, and he hate thee."

The *infinitive* is preceded by the particle *to*, expressed or understood, and denotes things in a general way, without distinction of number or person; as, "It is of importance to the sum of human felicity, not to neglect minute attentions to make the most of life as it passes."

Tense is the distinction of time.

"In English, we can express but two tenses by one word; namely, the *present*, as *advise*; and the *past*, as *advised*: yet as we often have occasion to divide time into more than two parts, we are obliged to have recourse to *auxiliaries*, or *helping words*. These enable us to divide the past time into three degrees, and to bring in a future, which we can divide into two degrees, making in the whole six divisions of time; and the particle *preter* (signifying *past*), prefixed to the names of some of the tenses, is of singular service in pointing out the tenses reckoned as past."—*Lindley Murray Examined*.

There are six tenses; namely, the *present*, the *preterimperfect*, the *preterperfect*, the *preterpluperfect*, the *imperfect future*, and the *perfect future*.

The *present* and *preterimperfect* are formed by the verb alone, and are called *simple tenses*; the rest are formed with the aid of auxiliaries, and are called *compound tenses*.

The *present* tense denotes an action or an event now passing, or some circumstance or property now existing; as,—

"Think we, or think we not, time hurries on,

With a resistless unremitting stream."

"By ceaseless action, all that is, subsists."

The *preterimperfect* denotes a finished action or event; as, "And Esau ran and met him, and embraced him, and fell on his neck, and kissed him; and they wept." It denotes also an action or an event remaining incomplete at a certain time past; thus, "Two of them went that day to Emmaus; and while they communed and reasoned [were communing and reasoning], Jesus himself drew near, and went with them."

The *preterperfect* refers to what is past, and also alludes to time present; as,—

"Friendship! how much thou hast deserved from me!
Oft have I proved the labours of thy love."

The *preterpluperfect* represents a circumstance as past, prior to some other

circumstance, or some particular time; as,—

"Scarce had the happy tenant proved the sweets
Of the fair spot, when straight he must be gone."

The *imperfect future* denotes an intended action, or a circumstance that has yet to take place; as,—

"The storms of wintry time will quickly pass,
And one unbounded spring encircle all."

The *perfect future* intimates that some action will or will not be finished, or some event will or will not have taken place, by, at, or before a certain time; or before some other action or event: as, "Verily, I say unto you, ye shall not have gone over the cities of Israel before the Son of Man come."

The tenses also represent an action as incomplete or imperfect; as in the phrase, *I am writing*; or complete and perfect; as in the phrase, *I have written*.

OF THE PARTICIPLE.

The participle is an inflection of the verb, having the properties of the verb, the adjective, and the noun.

As a *verb*, it is either *transitive* or *intransitive*, as the verb from which it is formed; thus, "Having food and raiment, let us be therewith content." "And so much the more, as we see the day approaching."

It has five tenses; two simple and three compound. The simple tenses are, the present, ending in *ing*, as *pleasing*; and the past, ending (if the verb is regular) in *ed*, as *pleased*:—the compound tenses are, in the active voice, the past, as, *having pleased*; and in the passive voice, the present, as *being pleased*, and the past, as *having been pleased*.

As an *adjective*, it describes nouns; as, "The parched earth welcomes the refreshing rain; a feeling heart; departed worth."

As a *noun*, it is always in the present simple tense; as, "What *stutting*, *digging*, *ploughing*, and *harrowing* are to land; *thinking*, *reflecting*, and *examining* are to the mind."

OF THE AUXILIARY.

The auxiliary is used in forming such tenses as the verb cannot form of itself; as, "So *have* I striven to preach the gospel, where Christ was not named, lest I should build on another man's foundation."

The auxiliaries are, *be*, *do*, *have*, *shall* and *will*, *can*, *may*, and *must*, with their inflections.

They are conjugated as follows:—

BE.

The conjugation of the auxiliary and the intransitive verb *be*, appears in *Italic*

A Compendious English Grammar.

characters in the conjugation of the transitive verb *call*, passive voice.

DO.

Present Tense.

Sin. I do, Thou dost or you do, He does.
Plu. We do, Ye or you do, They do.

Preterimperfect Tense.

Sin. I did, Thou didst or You did, He did.
Plu. We did, Ye or you did, They did.

HAVE.

Present Tense.

Sin. I have, Thou hast or You have, He hath or has.
Plu. We have, Ye or you have, They have.

Preterimperfect Tense.

Sin. I had, Thou hadst or You had, He had.
Plu. We had, Ye or you had, They had.

The auxiliaries *shall* and *will*, with their inflections, have distinct meanings, and are interchanged in the different persons.

Shall and *should*, in the first person, express simple futurity; and in the second and third persons, imply a command or decision of the speaker.

Will and *would*, in the first person, imply a command or decision of the speaker; and in the second and third persons, express only simple futurity.

SHALL.

Present Tense.

Sin. I shall, Thou wilt or you will, He will.
Plu. We shall, Ye or you will, They will.

Preterimperfect Tense.

Sin. I should, Thou wouldst or you would, He would.
Plu. We should, Ye or you would, They would.

WILL.

Present Tense.

Sin. I will, Thou shalt or you shall, He shall.
Plu. We will, Ye or you shall, They shall.

Preterimperfect Tense.

Sin. I would, Thou shouldst or you should, He should.
Plu. We would, Ye or you should, They should.

This is according to the mode of speaking in practice every day; yet I know of only one grammarian that has adopted it.

CAN.

Present Tense.

Sin. I can, Thou canst or you can, He can.
Plu. We can, Ye or you can, They can.

Preterimperfect Tense.

Sin. I could, Thou couldst or you could, He could.
Plu. We could, Ye or you could, They could.

MAY.

Present Tense.

Sin. I may, Thou mayst or you may, He may.
Plu. We may, Ye or you may, They may.

Preterimperfect Tense.

Sin. I might, Thou mightst or you might, He might.
Plu. We might, Ye or you might, They might.

MUST.

Present and Preterimperfect Tenses.

Sin. I must, Thou or you must, He must.
Plu. We must, Ye or you must, They must.

Be, do, and have, are sometimes real verbs, and conjugated in the same manner.

The conjugation of a verb is the regular combination of its several voices, modes, tenses, numbers, and persons.

A verb is *regular*, whose preterimperfect tense of the indicative mode, and past participle, are formed by adding to the verb *ed*; or *d* only, if the verb ends in *e*.

<i>Present.</i>	<i>Preterimperf.</i>	<i>Past Part.</i>
I labour.	I laboured.	Labourd.
I aspire.	I aspired.	Aspired.

A regular verb transitive is conjugated as the following verb *to call*.

INDICATIVE MODE.

Present Tense.

ACTIVE VOICE.

Sin. 1. I call.
2. Thou callest or you call.
3. He, she, or it calleth or calls.
Plu. 1. We call.
2. Ye or you call.
3. They call.

PASSIVE VOICE.

Sin. 1. I am called.
2. Thou art or you are called.
3. He is called.
Plu. 1. We are called.
2. Ye or you are called.
3. They are called.

Preterimperfect.

Sin. 1. I called.
2. Thou calldst or you called.
3. He called.
Plu. 1. We called.
2. Ye or you called.
3. They called.

Sin. 1. I was called.
2. Thou wast or you were called.
3. He was called.
Plu. 1. We were called.
2. Ye or you were called.
3. They were called.

A Compendious English Grammar.

Preterperfect.

ACTIVE VOICE.

- Sin.* 1. I have called.
2. Thou hast or you have called.
3. He has called.
Plu. 1. We have called.
2. Ye or you have called.
3. They have called.

PASSIVE VOICE.

- Sin.* 1. I have been called.
2. Thou hast or you have been called.
3. He has been called.
Plu. 1. We have been called.
2. Ye or you have been called.
3. They have been called.

Preterphyperfect.

- Sin.* 1. I had called.
2. Thou hadst or you had called.
3. He had called.
Plu. 1. We had called.
2. Ye or you had called.
3. They had called.

- Sin.* 1. I had been called.
2. Thou hadst or you had been called.
3. He had been called.
Plu. 1. We had been called.
2. Ye or you had been called.
3. They had been called.

Imperfect Future.

- Sin.* 1. I shall call.
2. Thou wilt or you will call.
3. He will call.
Plu. 1. We shall call.
2. Ye or you will call.
3. They will call.

- Sin.* 1. I shall be called.
2. Thou wilt or you will be called.
3. He will be called.
Plu. 1. We shall be called.
2. Ye or you will be called.
3. They will be called.

Perfect Future.

- Sin.* 1. I shall have called.
2. Thou wilt or you will have called.
3. He will have called.
Plu. 1. We shall have called.
2. Ye or you will have called.
3. They will have called.

- Sin.* 1. I shall have been called.
2. Thou wilt or you will have been called.
3. He will have been called.
Plu. 1. We shall have been called.
2. Ye or you will have been called.
3. They will have been called.

IMPERATIVE MODE.

- Sin.* 1. Let me call.
2. Call thou, or do thou or you call.
3. Let him call.
Plu. 1. Let us call.
2. Call ye or you, or do ye or you call.
3. Let them call.

- Sin.* 1. Let me be called.
2. Be thou or you called.
3. Let him be called.
Plu. 1. Let us be called.
2. Be ye or you called.
3. Let them be called.

POTENTIAL MODE.

Present Tense.

(May, can, must.)

- Sin.* 1. I may call.
2. Thou mayst or you may call.
3. He may call.
Plu. 1. We may call.
2. Ye or you may call.
3. They may call.

- Sin.* 1. I may be called.
2. Thou mayst or you may be called.
3. He may be called.
Plu. 1. We may be called.
2. Ye or you may be called.
3. They may be called.

Preterimperfect.

(Might, could, would, should.)

- Sin.* 1. I might call.
2. Thou mightst or you might call.
3. He might call.
Plu. 1. We might call.
2. Ye or you might call.
3. They might call.

- Sin.* 1. I might be called.
2. Thou mightst or you might be called.
3. He might be called.
Plu. 1. We might be called.
2. Ye or you might be called.
3. They might be called.

Preterperfect.

(May, can, must have.)

- Sin.* 1. I may have called.
2. Thou mayst or you may have called.
3. He may have called.
Plu. 1. We may have called.
2. Ye or you may have called.
3. They may have called.

- Sin.* 1. I may have been called.
2. Thou mayst or you may have been called.
3. He may have been called.
Plu. 1. We may have been called.
2. Ye or you may have been called.
3. They may have been called.

A Compendious English Grammar.

Preterpluperfect.

(Might, could, would, should have.)

ACTIVE VOICE.

- Sin.* 1. I might have called.
2. Thou mightst or you might have called.
3. He might have called.
- Plu.* 1. We might have called.
2. Ye or you might have called.
3. They might have called.

PASSIVE VOICE.

- Sin.* 1. I might have been called.
2. Thou mightst or you might have been called.
3. He might have been called.
- Plu.* 1. We might have been called.
2. Ye or you might have been called.
3. They might have been called.

SUBJUNCTIVE MODE.

Present Tense.

(If, though, lest, unless, whether.)

- Sin.* 1. If I call.
2. If thou or you call.
3. If he call.
- Plu.* 1. If we call.
2. If ye or you call.
3. If they call.

- Sin.* 1. If I be called.
2. If thou or you be called.
3. If he be called.
- Plu.* 1. If we be called.
2. If ye or you be called.
3. If they be called.

Preterimperfect.

- Sin.* 1. If I called.
2. If thou or you called.
3. If he called.
- Plu.* 1. If we called.
2. If ye or you called.
3. If they called.

- Sin.* 1. If I were called.
2. If thou or you were called.
3. If he were called.
- Plu.* 1. If we were called.
2. If ye or you were called.
3. If they were called.

INFINITIVE MODE.

Present Tense, To call.

Preterperfect, To have called.

Present Tense, To be called.

Preterimperfect, To have been called.

PARTICIPLES.

Present, Calling. Past, Called.
Compound Past, Having called.Present, Being called.
Past, Having been called.

OF IRREGULAR VERBS.

An *irregular* verb is one whose preterimperfect tense and past participle are formed without adding *d* or *ed* to the verb.

The following is a tolerably correct list of them:—

Present.	Preterimperf.	Past Part.
Abide,	abode,	abode.
Am,	was,	been.
Arise,	arose,	arisen.
Awake,	awoke, <i>n.</i>	awaked.
Bake,	baked,	baken, <i>n.</i>
Bear (<i>to bring forth</i>),	bare,	born.
Bear (<i>carry</i>),	bore,	borne.
Beat,	beat,	beaten.
Become,	became,	become.
Begin,	began,	begun.
Behold,	beheld,	beheld.
Bend,	bent,	bent.
Bereave,	bereft, <i>n.</i>	bereft, <i>n.</i>
Beseech,	besought,	besought.
Bid,	bade, <i>bid</i> ,	bidden.
Bind,	bound,	bound.
Bite,	bit,	bitten, <i>bit</i> .
Bleed,	bled,	bled.
Blow,	blew,	blown.
Break,	broke,	broken.
Breed,	bred,	bred.
Bring,	brought,	brought.
Build,	built,	built.
Burst,	burst,	burst.
Buy,	bought,	bought.
Cast,	cast,	cast.

Present.	Preterimperf.	Past Part.
Catch,	caught, <i>n.</i>	caught, <i>n.</i>
Chide,	chid,	chidden.
Choose,	chose,	chosen.
Cleave (<i>al-</i> here), <i>n.</i>		
Cleave (<i>split</i>),	clove, cleft,	cloven, cleft.
Cling,	clung,	clung.
Clothe,	clothed,	clad, <i>n.</i>
Come,	came,	come.
Cost,	cost,	cost.
Creep,	crept,	crept.
Crow,	crew, <i>n.</i>	crowed.
Cut,	cut,	cut.
Dare (<i>chal-</i> lenge), <i>n.</i>		
Dare (<i>ven-</i> ture),	durst,	dared.
Deal,	dealt, <i>n.</i>	dealt, <i>n.</i>
Dig,	dug, <i>n.</i>	dug, <i>n.</i>
Do,	did,	done.
Draw,	drew,	drawn.
Drink,	drank,	drunk.
Drive,	drove,	driven.
Dwell,	dwelt, <i>n.</i>	dwelt, <i>n.</i>
Eat,	ate,	eaten.
Fall,	fell,	fallen.
Feed,	fed,	fed.
Felch,	felt,	felt.
Fight,	fought,	fought.
Find,	found,	found.
Flee,	fled,	fled.
Fling,	flung,	flung.
Fly,	flew,	flown.
Forget,	forgot,	forgotten.

A Compendious English Grammar.

Present.	Preterimper.	Past Part.	Present.	Preterimper.	Past Part.
Forego,	forewent,	foregone.	Slay,	slaw,	slain.
Forsake,	forsook,	forsaken.	Sleep,	slept,	slept.
Freeze,	froze,	frozen.	Slide,	slid,	slidden.
Get,	got,	gotten, got.	Slung,	slung, slung,	slung.
Gild,	gilt, n.	gilt, n.	Slunk,	slunk, slunk,	slunk.
Gird,	girt, n.	girt, n.	Slit,	slit,	slit.
Give,	gave,	given.	Smite,	smote,	smitten.
Go,	went,	gone.	Sow,	sowed,	sown, n.
Grave,	graved,	graven, n.	Speak,	spoke, spake,	spoken.
Grind,	ground,	ground.	Speed,	sped,	sped.
Grow,	grew,	grown.	Spell,	spelt, n.	spelt, n.
Hang, <i>tosus-</i>]			Spent,	spent,	spent.
<i>pend to de-</i>]	hanged,	hanged.	Spill,	spilt, n.	spilt, n.
<i>stroy life;</i>]			Spin,	spun, span,	spun.
<i>otherwise</i>]	hung,	hung.	Spit,	spat, spit,	spitten, spit.
Have,	had,	had.	Split,	split,	split.
Hear,	heard,	heard.	Spread,	spread,	spread.
Heave,	hove, n.	hoven, n.	Spring,	sprang, sprung,	sprung.
Hew,	hewed,	hewn, n.	Stand,	stood,	stood.
Hide,	hid,	hidden, hid.	Steal,	stole,	stolen.
Hit,	hit,	hit.	Stiek,	stuck,	stuck.
Hold,	held,	holden, held.	Sting,	stung,	stung.
Hurt,	hurt,	hurt.	Stink,	stank, stunk,	stunk.
Keep,	kept,	kept.	Strew,	strewed,	strown.
Kneel,	knelt, n.	knelt, n.	Stride,	strode,	stridden. [en,
Knit,	knit, n.	knit, n.	Strike,	struck,	struck, strick-
Know,	knaw,	known.	String,	strung,	strung.
Lade,	laded,	laden.	Strive,	strove,	striven.
Lay,	laid,	laid.	Swear,	swore,	sworn.
Lead,	led,	led.	Sweat,	sweat,	sweat.
Leave,	left,	left.	Sweep,	swept,	swept. [en,
Lend,	lent,	lent.	Swell,	swelled,	swelled, swol-
Let,	let,	let.	Swim,	swam, swum,	swum.
Lie (<i>repose</i>),	lay,	lain.	Swing,	swang, swung,	swung.
Light,	lit, n.	lit, n.	Take,	took,	taken.
Load,	loaded,	loaden.	Teach,	taught,	taught.
Loose,	lost,	lost.	Tear,	tore,	torn.
Make,	made,	made.	Tell,	told,	told.
Mean,	meant, n.	meant, n.	Think,	thought,	thought.
Meet,	met,	met.	Thrid,	thrid,	thrid.
Mow,	mowed,	mown.	Thrive,	throve, n.	thriven.
Pay,	paid,	paid.	Throw,	threw,	thrown.
Put,	put,	put.	Thrust,	thrust,	thrust.
Quit,	quitted, quit,	quit.	Tread,	trod,	trodden.
Read,	read,	read.	Wax,	waxed,	waxen, a.
Rend,	rent,	rent.	Wear,	wore,	worn.
Rid,	rid,	rid.	Weave,	wove,	woven.
Ride,	rode,	ridden.	Weep,	wept,	wept.
Rift,	rift,	rift.	Wet,	wet, n.	wet, n.
Ring,	rang, rung,	rung.	Win,	won,	won.
Rise,	rose,	riscn.	Wind,	wound,	wound.
Rive,	rived,	riven.	Work,	wrought, n.	wrought, n.
Run,	ran,	run.	Wring,	wrung,	wrung.
Saw,	sawed,	sawn, n.	Write,	wrote,	written.
Say,	said,	said.			
See,	saw,	seen.			
Seck,	sought,	sought.			
Seethe,	seethed,	soddn.			
Sell,	sold,	sold.			
Send,	sent,	sent.			
Set,	set,	set.			
Shake,	shook,	shaken.			
Shape,	shaped,	shapen, n.			
Shave,	shaved,	shaven, a.			
Shear,	shore,	shorn.			
Shed,	shed,	shed.			
Shine,	shone, n.	shone, n.			
Shoe,	shod,	shod.			
Shoot,	shot,	shot.			
Show,	showed,	shown.			
Shred,	shred,	shred.			
Shrink,	shrank,	shrunk.			
Shut,	shut,	shut.			
Sing,	sang, sung,	sung.			
Sink,	sank, sunk,	sunk.			
Sit,	sat,	sitten, sat.			

EX. — THERE IS A GREAT NUMBER OF EXCEEDING GOOD WRITERS AMONG THE FRENCH.

KEY. — THERE ARE A GREAT NUMBER OF EXCEEDINGLY GOOD WRITERS AMONG THE FRENCH.

A *defective* verb is one that is used in some only of the modes, tenses, and persons, and is also irregular.

An *impersonal* verb is one that is construed with the neuter pronoun *it*, and is used only in the third person singular; as, "It *lightens*, it *thunders*;" "Here the lank miser, eased of a tax it *irked* the wretch to pay, lies cheaply lodged."

A *finite* verb is a verb in any mode but the infinitive.

OF THE ADVERB.

The adverb is joined to adjectives, verbs participles, or other adverbs, to express their quality, or some attendant circumstance; thus, "Be *kindly* affectioned one to another." "Walking *uprightly*, man

A Compendious English Grammar.

walketh securely." "The hair contributes very greatly to the beauty of the countenance."

Some adverbs are compared as adjectives, either by adding *r* or *er* and *est*; as, *late, later, latest*; *soon, sooner, soonest*; or by the aid of *more* and *most*, *less* and *least*; as, *more happily, most willingly*; *less readily, least perceptibly*.

OF THE PREPOSITION.

The preposition is used to connect words; and is placed chiefly before nouns and pronouns, to show the relation they have to some other words: thus, "The worth of a thing is best known by the want of it." "For the purpose of being scattered by the wind, some seeds are furnished with a sort of wings."

OF THE CONJUNCTION.

The conjunction is used to connect words and sentences; as, "Life and death are in the power of the tongue." "Good words cost nothing, but are worth much."

Conjunctions are of two sorts, *copulative* and *disjunctive*.

The *copulative* conjunction joins words

and sentences, and connects their meanings also; thus, "The sun diffuses light and life throughout the creation; and without him, all nature would languish and die."

The *disjunctive* conjunction unites words and sentences, but disjoins their meanings; thus, "Give me *neither* poverty nor riches; lest I be full, and deny thee; or poor, and steal, and take thy name in vain."

Or and *nor* are sometimes elegantly put for *either* and *neither*, at the beginning of a sentence:—

"Safe in the hand of one disposing Power,
Or in the natal or the mortal hour."

"Nor infancy, in warm caress,
Its mother's hope and happiness;
Nor ruddy youth, nor manhood's prime,
Can boast beyond the present time."

OF THE INTERJECTION.

The interjection is a word, or words, used to express some sudden passion or emotion of the mind; as, "The golden hours are past, and I knew not their value; they fled in haste, and, alas! they will never return." "Throw empires away, and be blameless; but, oh! husband thy precious hours."

OF SYNTAX.

SYNTAX treats of the connection and proper arrangement of words, in the formation of sentences; and is subject to certain rules.

A sentence is an assemblage of words making complete sense.

Sentences are of two kinds; simple and compound.

A simple sentence contains only one subject and one finite verb; and makes complete sense without the aid of relative or conjunction; thus, "Man wants but little here below."

A compound sentence contains two or more simple sentences, connected by relatives or conjunctions; thus, "The sun's vivifying rays may be considered as an emblem of the happy influence of a truly good man, who scatters joy and blessings on all around." "Man wants but little here below, nor wants that little long."

A phrase is two or more words rightly put together; and forming sometimes part of a sentence, and sometimes a whole one; as, "In human hearts," "what bolder thought can rise," "than man's presumption on to-morrow's dawn?"

Syntax consists of two parts; concord and government.

Concord is the agreement of one word with another, in gender, number, case, or person.

Government is one word's requiring another to be in a particular case, mode, or tense.

RULE I.

The article *a* is used before nouns in the singular number, and adjectives, beginning with any consonant but silent *h*; as, "a bee, a hive, a honeyed tongue."

The article *an* is used before nouns in the singular number, and adjectives, beginning with a vowel or silent *h*; as, "an autograph, an helress, an absolute fact." It is used before *h* aspirated, also, in words accented on the second or the fourth syllable; as, "an hyena, an historiographer."

The article *the* is used before nouns in either number; as, "On the sabbath, the slaves and cattle of the Jews had rest."

But there are many nouns which do not require an article before them; as,

"When avarice enslaves the mind,
And selfish views alone bear sway,
Man turns a savage to his kind,
And blood and rapine mark his way."

1. When a word beginning with a vowel is coupled with one beginning with a consonant, the *indefinite* article should be resonant; thus, "It is necessary to an easy and a happy life, to possess our minds in such a manner, as to be well satisfied with our own reflections."

2. "There is a particular use of the *indefinite* article which merits attention. In denoting comparison, when the article is suppressed before the second term, the latter, though it may be an appellative, assumes the character of an attributive, and becomes the predicate of the subject or first term. Thus, if we say, 'He is a

A Compendious English Grammar.

better soldier than scholar,' the article being suppressed before the second term, the expression is equivalent to 'he is more warlike than learned.' If, on the contrary, the second term be preface to the article, as in 'He would make a better soldier than a scholar,' this term continues an appellative, and forms the other subject of comparison. The meaning accordingly is, 'he would make a better soldier than a scholar would make.' In the former case, the subject, as possessing different qualities in various degrees, is compared with itself; in the latter, it is compared with something else. These two phraseologies are frequently confounded, which seldom fails to create ambiguity."—*Crombie*.

3. "The definite article is used to distinguish between things which are individually different, but have no generic name, and things which are, in truth, one and the same, but are characterized by different qualities. For example, if I should say, 'The red and blue vestments were most admired,' it might be doubted whether I meant that the union of red and blue in the same vestment was most admired, or that the red and the blue vestments were both more admired than the rest. In strictness of speech, the former is the only proper meaning of the words, though the latter sentiment is often thus expressed. If the latter be intended, we should say, 'the red vestments and the blue,' or 'the red and the blue vestments,' where the article is repeated. If I say, 'the red and blue vestments,' it is obvious that only one subject is expressed, namely, 'vestments,' characterised by the two qualities, 'redness' and 'blueness,' as combined in the subject. Here the subject is one; its qualities are plural. If I say 'the red vestments and the blue,' the subjects are plural, expressed, however, by one generic name, *vestments*. 'The lords spiritual and temporal,' and 'the civil and military authorities,' are phraseologies objectionable on the same principle.

"When two or more adjectives are used as epithets to one and the same thing, and the article is not used, the place of the noun ought to show whether both adjectives belong to the same thing, or to different things having the same generic name. 'Near and remote beauties,' 'things sacred and secular,' 'ancient and modern authors,' 'new and old books.' This arrangement is faulty; both epithets cannot belong to the same subject. It should be 'near beauties and remote,' 'sacred things and things secular,' 'ancient authors and modern,' 'new books and old.'"—*Crombie*.

4. "The indefinite article, though generally placed before the adjective, as 'a good man,' is put after the adjective *such*; and where the qualifying words, *as, how, so, and too* occur, its place, except in inverted sentences, is between the adjective and the noun; thus, 'Such a gift is too small a reward for so great a service.' The definite article is likewise placed before the adjective, as 'The great globe itself.' All is the only adjective that precedes this article; as,

'Happy the man who sees a God employ'd
In all the good and ill that chequer life!'

RULE II.

Every nominative case, except the nominative absolute, must have a finite verb or an auxiliary, expressed or understood, agreeing with it; thus, "No man is great but in proportion as he restrains and subdues his passions." "Happy they whose improvement has kept pace with the fleeting minutes; who have seized the important fugitives, and engaged them in the pursuit of wisdom." That is, "Happy are they."

The nominative case absolute is when a noun or a pronoun is joined to the present participle, in an independent sentence; thus, "It is remarkable, that an eldest son of the house of Braganza has never reigned; something having always occurred to prevent it. Sometimes the participle is omitted: thus,

"Youth lost in dissipation, we deplore,
Through life's sad remnant, what no
sighs restore."

That is, "youth being lost."

Sometimes both the participle and the pronoun are omitted: thus,

"In life embark'd, we smoothly down the
tide
Of time descend, but not on time in-
tent."

That is, "we having in life embark'd."

A. The nominative case generally precedes the verb, but sometimes it is put after it, or between the auxiliary and the verb.

1. When a question is asked, a command given, or a wish expressed: thus, "Lovest thou me?" "Come unto me, all ye that labour." "May we grow wiser and better as life wears away!"

2. When a supposition is made without a conjunction; as, "Were justice followed, then would man be good." "Oh, had those lips but language!"

3. When an intransitive verb is used; as, "Sweet is the remembrance of a well-spent life." "I touched the string on which hung all her sorrows."

4. When the verb is preceded by the adverbs *here, there, where, then, thus, &c.*; as, "Here lies in dust the Theban obelisk." "There sleeps the sage in peace, who bade oppression cease." "Where rest the mighty guardians of mankind." "Thus passes all, by Time controlled, to an irremediable doom." "Then come, Reflection, nymph of sober mien, teach me to meditate the solemn sense."

5. To impart strength and vivacity to the expression; as, "So flourish'd, blooming, and unseen by all, the sweet Lavinia."

B. A plural noun or pronoun, connected by the preposition *of* with a singular noun in the nominative case, is sometimes mistaken for the nominative case, and the verb erroneously made to agree with it; as in the following examples:—"Though numberless victims, in all the pride of youth and beauty, have prematurely

A Compendious English Grammar.

dropped into the grave before their eyes, still, from the duchess to the housemaid, the *symmetry of their forms continue* to be preferred, to the preservation of modesty, health, and even life itself." "Although there were no fewer than five persons in the room at the time, not *one of them were* conscious of the moment of his dissolution." Correct this: "the *symmetry of their forms continues*; not *one of them was*."

RULE III.

Two or more nominatives in the singular number, connected by the copulative conjunction *and*, expressed or understood, require a plural verb; thus,

"*Faune, honour, beauty, state, train, blood, and birth,*

Are but the fading blossoms of the earth."

"And now *abide faith, hope, charity,* these three; but the greatest of these is charity."

1. Notwithstanding the intervention of *and*, if, through a disuniting word, the predicate be, in sense, applicable to only one of the nominatives, or to both of them taken separately, the verb must be singular if the noun is singular; thus, "*Wisdom, [and] not years, is the gray hair to man.*"

2. A verb between two nouns in the singular number, joined by a copulative conjunction, must necessarily be in the singular number, being applicable to them both singly, though expressed only to the former; thus, "*The world passeth away, and the lust thereof.*"

3. "It was customary with the writers of antiquity, when the nouns were nearly synonymous, to employ a verb singular; as, 'understanding, reason, and prudence is in old men.' In similar instances, some English authors have employed a verb singular. ['I hate the cruel *pride* and *arrogance* that makes men boast over a conquered foe.'] I concur, however, with L. Murray, in disapproving this phraseology; for either the terms are synonymous, or they are not. If they are, only one term should be retained, and a verb singular joined with it; if not, there are as many distinct ideas as terms, and a plural verb should be used." — *Crombie*.

4. "In such expressions as the following, it has been doubted whether the verb should be in the singular or in the plural number: — 'Every officer and soldier claim a superiority in regard to other individuals.' Here, I conceive, the phraseology is correct. The expression, 'Every officer and soldier claims,' might signify one individual under two different designations. Whether we should say, 'Every officer and every soldier claim,' is a point more particularly questioned. We often hear correct speakers say in common conversation, 'Every clergyman, and every physician, is by education a gentleman;' and there seems to be more ease, as well as more precision, in this than in the other mode of expression. It is unquestionably, however, more agreeable to analogy to say, 'are gentlemen.'" — *Crombie*.

RULE IV.

Two or more nominatives in the singular number connected by the disjunctive conjunction *or* or *nor*, expressed or understood; or the phrase *as well as*; require a singular verb: thus, "Whatsoever thy hand findeth to do, do it with thy might; for there is no *work, nor device, nor knowledge, nor wisdom, in the grave, whither thou goest.*" "The quantity *as well as* the quality of what he ate or drank, *was* prescribed, by the laws, to the king."

RULE V.

Two or more nominatives of different numbers, or of different persons, joined by a disjunctive conjunction, require verbs and auxiliaries to agree with the nearer nominative; as, "Some countries are so cold, that neither the trees *nor* the earth produces fruits that will nourish man."

RULE VI.

When two nominatives of different numbers are joined by a disjunctive conjunction, the latter of them explanatory of the former, the verb must agree with the former; as, "The *Decalogue, or Ten Commandments, is* in two parts." "The *Aurora Borealis, or Northern Lights, was* first observed in March, 1715-16."

RULE VII.

Every nominative having a plural signification, though not a plural form, if conveying the idea of *number*, must have a plural verb or pronoun agreeing with it; as, "In youth, the *multitude pursue* pleasure as their chief good." If conveying the idea of an *aggregate body*, it must have a verb or a pronoun agreeing with it in the singular number; as "The youthful party *was* quite delighted."

"On many occasions, where a noun of number is used, it is very difficult to decide, whether the verb should be in the singular or in the plural number: and this difficulty has induced some grammarians to cut the knot at once, by asserting that every noun of number, as it constitutes one aggregate of many particulars, must always be considered as conveying the idea of unity; and that, consequently, the verb and pronoun connected with it, cannot properly be ever used in the plural number. This opinion is contrary to the practice of the best writers, and against the rules of the most respectable grammarians. Some nouns of number certainly convey to the mind an idea of plurality, as *nobility, gentry, clergy, commonalty, peasantry, soldiery, ancestry*; others, that of a whole as one thing, as *court, army, meeting, congregation, parliament, party*; and others again, sometimes that of unity, and sometimes that of plurality, as, *committee, council, enemy, people, public, senate*; and on this ground it is warrantable, and consistent, to apply a plural verb and pronoun to the one class, and a singular verb and pronoun to the other. The impropriety of the following constructions must be immediately perceived. "The *nobility, exclusive of its capacity as hereditary counsellor of the crown, forms* the pillar to

A Compendious English Grammar.

support the throne.' 'The *commonalty* is divided into several degrees.' 'What reason *have* the *army* for proceeding in this manner?' 'The *congregation* were unusually large and respectable.' In all these instances respectively, a different verb and pronoun should have been used; and if the reader would apply them in revising the sentences, he would perceive the propriety of the change."

RULE VIII.

When two nouns, or a noun and a pronoun, meaning the same person or thing, come together, they are in apposition, that is, in the same case; thus, "And Joseph was brought down to Egypt, and sold to Potiphar, an *Egyptian*, captain of the guard, an *officer* of Pharaoh." "God hath made me a *father* to Pharaoh, *lord* of all his house, and *ruler* throughout the land of Egypt."

RULE IX.

When two nouns, or a pronoun and a noun, or a relative and a noun, come together, the latter denoting the property or possession of the former, the latter requires that the former be in the possessive case; as, "And the Lord blessed the *Egyptian's* house for *Joseph's* sake."

1. "This case is generally resolvable into the objective with the preposition of, as, 'the king's sceptre,' or, 'the sceptre of the king;' 'his head,' or, 'the head of him.' I have said generally, for it is not always thus resolvable. For example, the Christian sabbath is sometimes named 'the Lord's day,' but, 'the day of the Lord' conveys a very different idea, and denotes 'the day of judgment.'" — (Crombie.) "A man of [i. e. addicted to] pleasure is a man of [i. e. liable to] pains."

2. When several nouns in the possessive case, immediately following each other, are governed by a subject as the common property of them all, the sign of the possessive case is annexed only to the last; as, "The Peshwa, Nizam, Rajah of Travancore, and Coorg *Rajah's* forces, amounted to about forty thousand men;" but when a subject belongs individually to several nouns, the possessive sign must be annexed to each; thus, "Among the many things which I brought off from the ship, were pens, ink, and paper; and several parcels in the *captain's*, *mate's*, *gunner's*, and *carpenter's* keeping."

3. When a name consists of more terms than one, the last only admits the sign of the possessive case; as, "Who has not read Robinson *Crusoe's* adventures?" When a short explanatory term is subjoined to a name, the sign may be annexed to either of them; as, "He lives at Cooper the *stationer's*, or at Cooper's the *stationer*." If there are more explanatory terms than one, the sign must be affixed to the name; as, "The books may be had at *Murray's*, the bookseller and publisher." When the words are so connected as not to admit a pause before the conclusion; or when words in apposition immediately follow each other, the sign should be placed at or near the end; thus, "He was

invited to become a trustee, in consequence of one of the individuals appointed under the *will's* declining to act. I am thy servant Jesse the *Bethlehemite's* youngest son."

4. Little explanatory circumstances should never occur between the possessive case and the word which usually follows it: "There are several handsome mosques within the fort; but no buildings worth notice in its vicinity, except Gholaum Shah's (the founder of the city) tomb on a hill to the south." Better, "except the tomb of Gholaum Shah, the founder of the city, on a hill to the south."

RULE X.

Pronouns must always represent correctly the nouns for which they stand, in person, gender, number, and case; as, "The moment a *woman* steps out of her proper sphere, she ceases to be, in proportion to her deviation from the path prescribed to her, either amiable or respectable. All *men* think all men mortal but *themselves*. Improve each *moment* as it flies."

The neuter pronoun *it* is associated, by a peculiar idiom, with nouns and pronouns, whatever is their gender or number; as, "It is not *troops*, it is not *treasures*, that are the support of a kingdom; but *friends*."

RULE XI.

The relatives *who*, *which*, and *that*, always belong to an antecedent noun or pronoun, expressed or understood; as, "He *who* gathereth in summer is a wise son, but he *that* slepeth in harvest is a son that causeth shame. *That* charity is most useful *which* promotes industry."

1. As the relative is always of the same person as the antecedent, the verb must agree with it accordingly; thus, "I *who* am desirous of instruction, disdain not to listen to any one who has knowledge to communicate. Who art thou, O man! *that* presumest on thine own wisdom?" "He *who* increaseth his riches, increaseth his cares."

2. Sometimes a whole clause is antecedent to the relative; as "If there is but a step between us and death; *if* death may come upon us in a moment; *which* numberless instances prove; surely it behoves us to be prepared for its approach."

3. When the relative and its antecedent come together, and are nominatives to different verbs, the relative is nominative to the former, and the antecedent to the latter; as, "He *who* reminds a man of a benefit, *demand*s it again; nor must we tell others of it; he *that* hath conferred a benefit, *must* be silent."

4. "Priestley has remarked, that the pronouns *whoever* and *whosoever* have sometimes a double construction; as in the two following examples:— 'Gustavus Adolphus was so far from thinking it derogated from the dignity of a gentleman, or the honour of an officer, to refuse a challenge, that he punished with death whoever presumed to decide a quarrel with

A Compendious English Grammar.

the sword.' 'He offered a great recompense to whomsoever would help him to a sight of him.' Though the learned author seems to admit both these modes of construction, we apprehend that only one of them is grammatical. The antecedent is often understood to the relative *who*, and to the compounds *whoever* and *whosoever*. If the antecedent be supplied, it will be found that the construction is not arbitrary, as Priestley supposes, but definite and fixed. The first sentence is correct. 'He punished with death *him* whoever presumed,' the relative being the nominative to the verb. 'He offered a great recompense to *him* or *them*, whosoever should help him.' *Whomsoever* is a solecism: though close to the preposition to, it is not under its government.—*Crombie*.

5. To distinguish one of two or more persons, the relative *which* must be used; as, "*Which*, now, of these three, thinkest thou, was neighbour to him that fell among the thieves?"

6. After adjectives in the superlative degree, the adjective *same*, and the interrogative *who*; and where there are two antecedents, one requiring *who* and the other *which*; the relative *that* is used in preference to *who* or *which*; thus, "The worst thief *that* I know is prostration." "He that dipeth his hand with me in the dish, is the *same* that shall betray me." "*Who* that now liveth, shall not surely die." "It was the lady, and not her fortune, *that* he married."

7. The only peculiarity in the construction of relatives, besides that of their invariably preceding the verb, is, that *whom* is always employed after *than*, though analogy requires *who*; "Fix the brand of infamy on the seducer, *than whom* a more atrocious character does not exist."

8. *What* is often improperly used instead of *which*; for instance, "If we are wise, we shall convert the melancholy event before us, not to the purposes of political speculation, fruitless conjecture, or anxious foreboding, but (*what* is infinitely better) to a profound consideration of the hand of God." It ought to be, "*which* is infinitely better." Johnson properly uses *which* in the following quotation: "By some fortuitous liquefaction, mankind were taught to produce a body at once solid and transparent; which would admit the light of the sun, and exclude the violence of the wind; and extend the sight of the philosopher to new ranges of existence; and charm him, at one time, with the unbounded extent of the material creation, at another, with the endless subordination of animal life; and, *which* is yet of greater importance, supply the decays of nature with subsidiary sight."

RULE XII.

A noun, or a pronoun, that answers an interrogation, must be in the same case as the interrogative; thus, "*Whose* son is he? They say unto him, *David's*."

RULE XIII.

When there is no nominative case between the relative and the verb, the relative is itself the nominative case; thus,

"Those *who* want health, want every thing." "Every thing *which* conveys useful information, is a fit subject for liberal curiosity." "He *that* considers how soon he must close his life, will find nothing of so much importance as to close it well."

The relative, whether in the nominative, the possessive, or the objective case, invariably precedes the verb; thus, "He *who* is useful will always be respected." "There was a certain nobleman *whose* son was sick at Capernann." "Those *whom* conscience and virtue support, may smile at the caprices of fortune." "Sea-salt is lighter than that *which* we commonly use." "Goodness affords the only comfort *which* can be enjoyed without a partner."

RULE XIV.

When a nominative comes between the relative and the verb, the relative either belongs to some noun, or is governed by some verb, participle, or preposition, in its own member of the sentence; thus, "How small the bliss *which* sense alone bestows!"

RULE XV.

When the relative and the verb are preceded by two nominatives of different persons, they must agree with the latter; as, "I, even I, am *he* that comforteth you."

In interrogative sentences like the following, the relative and the verb must agree in person with the former nominative; thus, "Is it you that interests himself so much for the family?" that is, "Is the person that interests himself so much for the family, you?"

RULE XVI.

Every adjective refers to some noun, expressed or understood; as, "On *this* side and on *that*." "I call upon the *younger* part of my readers to acquire, while their minds may yet be impressed with *new* images, a love of *innocent* pleasures, and an ardour for *useful* knowledge."

A. The adjective is generally placed immediately before the noun; as, "Tis *moral grandeur* makes the *mighty* man."

Exception 1. When the adjective is closely connected with some word or words following; as,

"Their own defect, *invisible* to them,
Seen in another, they at once condemn."

2. When connected with the verb to be, expressing simple affirmation; as, "Nothing can atone for the want of modesty; without *which*, beauty is *ungraceful*, and wit (is) *detestable*;" or with any other verb serving as a mere copula, to unite the predicate with its subject; as "Sun, stand thou *still*."

3. For the sake of harmony; as,
"But *truth* divine for ever stands secure."

4. When several adjectives are connected with the noun; as,
"Perhaps, at last, close scrutiny may show
The *ducl* *dastardly*, and *mean*, and *low*."

5. Adjectives denoting extent of space or time are put after the clause expressing

A Compendious English Grammar.

the measure; as, "A sermon *two hours long*;" "An infant *three months old*;" "A pillar *one hundred and fifty feet high*;" "A pit *four hundred yards deep*."

B. The adjective *such* is properly applicable to *species or nature*, and requires *as* to correspond to it; thus, "Shall not my soul be avenged on *such* a nation *as* this?" The word *so* applies properly to degree; as, "What nation is there *so* great, that hath statutes and judgments *so* righteous?"

C. *Such*, when signifying *those or so many*, requires *as* for its correlative term; the following sentence is therefore incorrect: "None are more ready to shrink in a day of trouble, than *such* who, while it is distant, seem most daring." It ought to be, "*such as*, while it is distant," &c.

D. The phrase *one another*, being applicable to more than two persons or things, ought not to be used when only two are mentioned: "Virtue and vice are diametrically opposed to *one another*." It should be, *each other*; or, *the one to the other*."

E. The adjective *whole*, when it signifies *all*, should never be joined to a plural noun: "A grand day of pilgrimage to Mount Ararat being appointed, the *whole* devotees who have visited Mecca, resort hither." In this sentence, "*whole* devotees" may imply *such as were not sick*: it ought to have been, either, "*all* the devotees," or, "*the whole of* the devotees."

F. The word *universal*, also, is equally liable to misconstruction: thus, "The *universal* Irish people have made the most ample preparations, to manifest their attachment to their sovereign." In this sentence, *universal* does not convey the intended idea; which is, that *all, without exception*, had made preparations: the sentence should therefore have been, "The Irish people, *universally*, have," &c.

G. Dr. Noah Webster, in the Grammar prefixed to his English Dictionary, Rule xviii., says, "Adjectives are used to modify the actions of verbs, and to express the qualities of things in connection with the action by which they are produced. Examples:—

"Open thine hand *wide*."

We observe in this passage, that *wide*, the attribute of hand, has a connection with the verb *open*; for it is not "open thy *wide* hand," but the attribute is supposed to be the *effect* of the act of opening. Nor can the modifier, *widely*, be used; for it is not simply the *manner* of the act which is intended, but the *effect*.

"Let us write *slow* and *exact*."

We might, perhaps, substitute *slowly* for *slow*, as describing only the manner of writing; but *exactly* cannot be substituted for *exact*, for this word is intended to denote the *effect* of writing, in the correctness of what is written. The adjective expresses the idea with a happy precision and brevity.

As this is one of the most common, as well as most beautiful idioms of our language, which has hitherto escaped due observation, the following authorities are subjoined to illustrate and justify the rule.

"We could hear distinctly the bells, which sounded sweetly *soft* and *penisive*." — *Chandler's Travels*.

"Magnesia feels *smooth*; calcareous earths feel *dry*; lithomarge feels very *greasy*, or at least *smooth*; yet some feels *dry* and *dusty*." — *Kirwan*.

"In Bradley's work, an apple is described, one side of which is sweet and boils *soft*; the other *sour*, and boils *hard*." — *Darwin, Phytol*.

"The cakes ate *short* and *crisp*." — *Goldsmith*.

"If you would try to live *independent*." — *Pope*.

"Thy brother has come; and thy father has killed the fatted calf, because he hath received him *safe* and *sound*."]

"The raw lazy influence spreads *wide*, sits *deep*, and hangs *heavy* on the springs of life."

"One day the soul, supine with ease and fullness, revels *secure*."

So far are the words here used from being adverbs, that they cannot be changed into adverbs without impairing the beauty, weakening the force, or destroying the meaning, of the passages. Let the sentences be put to the test—"Magnesia feels *smoothly*—the cakes ate *shortly* and *crisply*—the apples boil *softly* or *hardly*—thy brother has come: and thy father has killed the fatted calf, because he hath received him *safely* and *soundly*." Every English ear rejects this alteration at once; the sentences become nonsense. — *Dr. Crombie concurs with Webster*.

RULE XVII.

Demonstrative adjectives must agree in number with their nouns: as, "*That kind* of knowledge is the most valuable, which tends to make a man wiser and better." "In certain countries, there is but one season: *these countries* occupy the torrid zone: in *this zone*, the days and nights are of equal length during the greatest part of the year." "No wounds like *those* a wounded spirit feels."

1. In the following example, the adjective *that* is erroneously applied to a plural, as well as to a singular noun: "Now that the Scheldt is open, and Antwerp in the enjoyment of *that* good government and *wise regulations* formerly found only in Holland, it is doubtful whether Amsterdam will ever regain its former population and opulence." It ought to have been, "that good government, and *those* wise regulations."

2. The expressions *these kind* and *those kind* are gross solecisms. The correct phrases are, *this kind* and *that kind*.

RULE XVIII.

The distributive adjectives, *each*, *every*, *either*, and *neither*, require the nouns, pronouns, verbs, and auxiliaries connected with them, to be in the singular number; as, "*Each season* regularly succeeds the other, and *every season* has its peculiar charms." "No navigator has yet reached *either* pole."

A Compendious English Grammar.

"Thus things terrestrial wear a different hue, As youth or age persuades, and neither true."

1. The distributive adjective *every*, though referring only individually to several persons or things, "is sometimes joined to a plural noun, when the things are conceived as forming one aggregate; as, 'every twelve years,' that is, 'every period of twelve years.'" — *Crombie*.

2. The distributive adjective *either* is often used improperly instead of *each* and *any one*: thus, "A line of buildings extends on *either* hand, forming a magnificent street." "The situation is select, and at a central distance of about a mile from *either* of the five bridges."

RULE XIX.

Finite verbs and first auxiliaries must have a nominative case, either expressed or understood, agreeing with them in number and person: thus, "*Education begins the gentleman; reading, good company, and reflection finish him.*" "*I have been young.*" "*Let not the sun go down upon your wrath,*" that is, "*Let not ye.*"

1. Sometimes the infinitive mode, and sometimes part of a sentence, is the nominative case to the verb; as, "*To learn in youth, is less painful than to be ignorant in age.*" "*Bear and forbear is good philosophy.*" "Although error is multiform, truth is uniform: and that we should embrace the one, and reject the other, is of infinite consequence."

2. The nominative case usually precedes the verb, the objective follows it; and the order generally determines the case in nouns: but the *pronoun*, having a proper form for each of those cases, is sometimes, when in the objective case, placed before the verb, and when in the nominative, after it: as, "*Me fortune leads to traverse realms alone.*" "Are they Hebrews? so am I." "Now speakest thou plainly." "To-morrow, said he, thou shalt hear him."

3. "Were it not to remove the doubts arising from the vague and indecisive language of some grammarians, it would be unnecessary to state, that when the verbs between nouns of different numbers, whichever of them has priority of position, or whatever is their relative distance from the verb, the verb must invariably agree with its own subject. This is often the only means by which we can clearly discriminate subject and predicate; the confounding of which, except in those propositions which seem *identical*, cannot be regarded as a trivial error. When the subject and the predicate are of the same number, they may be distinguished by their position; the subject should precede the verb. We may truly say, 'humming-birds are animals;' but we cannot with truth affirm, in the same sense, that 'animals are humming-birds.' When they are of different numbers, they may be distinguished by the concord; the verb must agree in number with its own nominative: that is, with the word regarded as subject."

(*Grant*.) Thus, "The most grateful *incense* that ascends to heaven, is the prayers of the afflicted for those that comfort them." "The *prayers* of the afflicted for those that comfort them, are the most grateful incense that ascends to heaven."

RULE XX.

Transitive verbs and participles, in the active voice, govern the objective case, or the infinitive mode: thus, "Of these things *remind them, charging them* that they strive not about words to no profit." "*Study to be quiet, and to mind your own business.*"

1. "Sometimes a verb is construed with a whole clause as its objective case: thus, 'A mind imbued with moral science cannot approve *man's being made the property of man.*'

2. "Nouns have no particular termination for the objective case; it is distinguished merely by its position, which is after the verb; as, 'Alexander slew Clitus.' Reverse the order, and the meaning is reversed. By inattention to the place of the object, it oft happens that considerable ambiguity is produced; as in 'And all the air a solemn stillness holds,' in which it is impossible to ascertain, from the mere words, whether the *air* holds the *stillness*, or the *stillness* holds the *air*. Thus, also, when Pope says, 'And thus the son the fervent sire addressed,' it may be asked, Did the son address the sire, or the sire the son? A little attention would have prevented the ambiguity. If the sire addressed the son, the line would run thus: 'And thus his son the fervent sire addressed.' If the son addressed the sire, 'And thus the son his fervent sire addressed.' In such instances, the pronoun clearly indicates both the nominative and the objective case." — *Grant*.

3. *Intransitive* verbs cannot be made *transitive*, nor must *transitive* verbs ever be considered as *intransitive*. Particular notice should be taken of the difference between *lay*, and the irregular verb *lie*, *raise* and *rise*; especially because, both in writing and conversation, they are often absurdly confounded. *Lay* is *transitive*, and signifies to *place*; *lie* is *intransitive*, and means to be in a *recumbent posture*. *Raise* is *transitive*, and signifies to *set upright, to enhance*; *rise* is *intransitive*, and means to *get up from rest or from a fall, to increase in price or value*. The *preterimperfect* tense of *lay* is *laid*; of *lie*, *lain*; of *raise*, *raised*; of *rise*, *rose*; the *past participle* of *lay* is *laid*; of *lie*, *lain*; of *raise*, *raised*; of *rise*, *risen*. The following sentences are therefore incorrect: — "The coffin, urn, &c. were to *lay* in private state yesterday for a short time." "Yesterday the remains of the late duke *laid* in private state." "The studies of the naval hero had not *laid* among the votaries of the muse." "When the curtain was *raising* for the ballet." "As he *rose* his eyes, they met the inquiring ones of his mother and Miss Howard." "The sums *risen* by annual subscription being on the decline."

4. The following phraseology is equally objectionable: — "In the Gobelín manu-

A Compendious English Grammar.

factory I found several beautiful subjects just *manufacturing*." In this sentence, either the present participle of the passive voice (*being manufactured*) should have been used, or a different construction adopted: as, "In the Gobelins manufactory I found several beautiful subjects just *in the loom*."

RULE XXI.

Intransitive verbs and participles, and verbs transitive in the passive voice, admit other verbs after them in the infinitive mode: thus, "Public worship *tends to unite mankind*." "Endeavouring to keep the unity of the spirit in the bond of peace." "But Paul *was permitted to dwell* by himself."

1. Though the sign *to* is generally used before the latter verb, it is omitted before the verbs which follow *dare, bid, make, feel, need, hear, let, see*; as, "I *feel my heart throb strangely*." "I *see the rural virtues leave the land*." "Sick of the tumult where the trumpet's breath *bulks ruin smile*." "But *need they leave the land?*" "They *dare not longer stay*." "While Ocean *hears vindictive thunders roll*." "Thou shalt *make me hear of joy and gladness*."

"For *let kind nature do the best she can*, 'Tis woman still that makes or mars the man."

2. But the sign *to* is omitted only when the former verb is in the active voice; for when it is in the passive, the sign *to* is retained: as,

"She ne'er *is seen to weep, or heard to sigh*."

3. The infinitive mode is frequently admitted after nouns and adjectives; thus, "There is *a time to weep, and a time to laugh*." "Be *ready to hear, but slow to advise; slow to promise, but quick to perform*."

4. The verbs *think, suppose, believe, pretend*, and others expressing acts of the mind, are frequently used as *transitive* verbs, when perhaps, in strictness, they ought to be used as *intransitive* ones, with a corresponding phraseology; thus, "I *believe him to be a very honest man*." "Utterly unacquainted with those very discoveries *which he here pretends to be so evident*." "Many hours elapsed before he *could be said to reflect*." "Whom do you *suppose it to be?*" "Bills are *requested to be paid half yearly*." The sentences ought, I think, to be; "I *believe [that] he is a very honest man*." "Utterly unacquainted with those very discoveries *which he here pretends are so evident*." "Many hours elapsed before it *could be said that he reflected*." "Who do you *suppose it is?*" "It is *requested that bills be paid half yearly*."

RULE XXII.

The verb intransitive *be*, with intransitive verbs in general, and transitive verbs in the passive voice, require the case following to be the same as that which precedes them; as, "I am *he*." "It was *I*." "They took *him to be me*." "The country blooms a *garden and a grave*."

"And *Joseph was made ruler over all the land of Egypt*."

RULE XXIII.

The present participle, when used as a verb, does not admit an article before it, or the preposition *of* after it; as, "The instinct of animals for *preserving their young*, is stronger than the desire of *satisfying their own wants*."

As a noun, it is used in three ways:—1. With an article before it, and the preposition *of* after it; thus, "Whirlpools in the ocean are caused by rocks, and the meeting of numerous currents." 2. Without an article before it, or the preposition *of* after it; as, "Scarcely a day passes, in which some human being is not, without *warning*, summoned to the grave." 3. With an article, an adjective, or a possessive case before it; but without the preposition *of* after it; as, "Justice is *the paying a strict regard to the rights and interests of others; or the not preferring our own welfare to theirs*." "This *drinking cold water moderately in a morning, makes the pill and the purging-draught superfluous*." "Much depends on *John's observing the day; his neglecting it would give pain*."

"Some late writers have discarded a phraseology which appears unobjectionable, and substituted one which seems less correct; and instead of saying, 'Lady Macbeth's walking in her sleep, is an incident full of tragic horror,' would say, 'Lady Macbeth, walking in her sleep, is an incident full of tragic horror.' This seems to me an idle affectation of the Latin idiom, less precise than the common mode of expression, and less consonant with the genius of our language. For, ask what was an incident full of tragic horror; and, according to this phraseology, the answer must be, *Lady Macbeth*; whereas the meaning is, not that *Lady Macbeth*, but *her walking in her sleep*, was an incident full of tragic horror.

"This phraseology also, in many instances, conveys not the intended idea. For, as Priestley remarks, if it is said, 'What think you of my horse's running to-day?' it is implied that the horse did actually run. If it is said, 'What think you of my horse running to-day?' it is intended to ask, whether it be proper for my horse to run to-day. This distinction, though frequently neglected, deserves attention; for it is obvious, that ambiguity may arise from using the latter only of these phraseologies to express both meanings."—Crombie.

The present participle is also sometimes used absolutely; so: "This conduct, *viewing it in the most favourable light*, reflects discredit on his character." Here the participle is made absolute, and is equivalent to "*if we view it in the most favourable light*," or to the infinitive absolute, "*to view it in the most favourable light*."

RULE XXIV.

Verbs and nouns expressive of *hope, desire, expectation, intention*, &c. must be followed by the present tense of the in-

A Compendious English Grammar.

finitive, or the preterimperfect of the potential mode; thus, "We *expected* to find you quite well; and *hoped* you would spend the evening with us." "It was my *wish* to preserve the portion of the narrative composed by Dr. Leyden." "It was no part of Napoleon's *plan* to go to war," &c. "His *intention* was to remain at peace," &c.

"I have lost this game, though I thought I should have won it." It ought to be, "though I thought I should *win* it." "This," says Dr. Crombie, "is an error of the same kind as 'I expected to have seen you; I intended to have written.' The preterite time is expressed by, 'expected, intended,' and how far back soever that expectation or intention may be referred, the seeing or writing must be considered as contemporary, or as soon to follow; but cannot, without absurdity, be considered as anterior. It should be, 'I expected to see; I intended to write.'" Priestley, in defending the other phraseology, appears to me to have greatly erred; the expression implying a manifest impossibility. The action represented as the object of an expectation or intention, and therefore, in respect to these, necessarily future, cannot surely, without gross absurdity, be exhibited as past, or antecedent to these."

RULE XXV.

The past participle, and not the preterimperfect tense, of the irregular verbs, must be used after the auxiliaries *have* and *be*, with their inflections: thus, "These things I have *spoken* to you, that in me ye may have peace." "How hardly is the restive will of man first *broken* to duty!"

Between the past participle of intransitive verbs, and that of transitive verbs in the passive voice, there is a distinction, which, in the use of them, deserves attention: the former ought generally to be preceded by an inflection of the auxiliary *have*, the latter by one of the auxiliary *be*; the following examples are therefore erroneous: "But see how this bustle *is fled* with the setting sun." "The beasts *are slunk* to their lair, and the birds *are retired* to their nests." "The castle and the cottage *are vanished* together." "Arise, shine, for your light *is come*, and the glory of the Lord *is risen* upon you." In these sentences *has* and *have* ought to have been used instead of *is* and *are*.

RULE XXVI.

Adverbs have no government; but are generally placed close to the words which they modify or affect. The usual arrangement is, before adjectives; as, "The winds are *particularly serviceable* for navigation and commerce;" before transitive verbs, as, "The field of battle *plainly told* the history of the fight;" after intransitive verbs, as, "The lord of the land *spoke roughly* to us;" between the auxiliary and the verb, as, "The man *did solemnly protest*, Ye shall not see my face, unless your brother be with you;" and between the auxiliary and the participle, as, "We *are fearfully* and *wonderfully made*."

1. "The force of adverbs (says Dr. Crom-

bie) depends on their position. The improper collocation of them, causes obscurity and misconception. In no case are writers so apt to err as in the position of the word *only*; whose place, in my opinion, is after the noun to which it refers, or which it exclusively implies, and before the attributive. In the following sentence of Addison's, the collocation is faulty: 'The practice of religion will *not only* be attended with that pleasure which accompanies actions to which we are habituated, but with those supernumerary joys that arise from a consciousness of such a pleasure.' This collocation implies, that the practice of religion would be something more than attended: whereas the author intended to say, that the practice of religion would be attended with something more than a certain pleasure. The sentence should therefore proceed thus: 'The practice of religion will be attended, *not only* with that pleasure,' &c. In the following sentence of Johnson's, the collocation is proper. 'He whose mind is engaged by the acquisition of a fortune, *not only* escapes the tediousness of inactivity, but gains enjoyments unknown to those who live lazily on the toils of others.'

"I have said, this word *only* should follow the noun, or pronoun, and precede the attributive. Perspicuity requires this arrangement, and correct writers observe it. 'The perfidious voice of flattery reminded him,' says Gibbon, 'that by exploits of the same nature, by the defeat of the Nemean lion, and the slaughter of the wild boar of Erymanthus, the Grecian Hercules had acquired a place among the gods, and an immortal memory among men. *They only* forgot to observe, that in the first ages of society, a successful war against savage animals, is one of the most beneficial labours of heroism.' In the beginning of the latter sentence, the adverb *only* is misplaced. As it stands, the meaning is, that they were the only persons who forgot: it should be, '*only* they forgot to observe; that is, 'one thing they forgot,' namely, 'to observe.'

2. "Adverbs are sometimes improperly used for adjectives; thus, 'After those wars, of which they hoped for a soon and prosperous issue.' 'Use a little wine for thy stomach's sake, and thine *often* infirmities.' 'A *soon* issue,' and '*often* infirmities,' are not English; adverbs cannot agree with nouns; they should be '*a speedy* issue,' and '*frequent*,' or, rather, '*many* infirmities.' 'The *then* ministry' for 'The ministry of *that time*;' and 'The *above* discourse' for 'The preceding discourse;' are exceedingly inelegant, and do not suit the idiom of our language."

3. The adverbs *where* and *whence* are not infrequently used incorrectly, instead of a relative and its governing preposition; as, 'A cause *where* justice was so much concerned.' It ought to be 'a cause *in which* justice,' &c.

4. We sometimes see *never* used instead of *ever*; as, 'Let the mind be *never* so capacious, *never* so active, it is not capable of constant labour, or total rest.' It should be, '*ever* so capacious, *ever* so active;'

A Compendious English Grammar.

that is, "how capacious or active soever."

5. *No*, as an adverb, is employed solitarily to negative a whole sentence; thus, "Art thou that prophet?"—"No." Otherwise, "I am not." It is improper to use *no* for *not*, in direct connection with other words.

RULE XXVII.

Two negatives in the same clause, or referring to the same thing, destroy each other, and leave the sense affirmative; thus, "It is not the eating, *nor* it is not the drinking, that must be blamed, but the excess." "*Neither* nature *nor* art holds no cement like sympathy of woe." Correct thus: "*nor* is it the drinking;" "*any* cement."

But when one of them forms a part of some other word, or when the adverb *only* intervenes, two negatives are correct; thus, "It is no *uncommon* thing to see from twelve to fifteen different sorts of shell-fish in the principal market at Naples." "We must *not* *only* *not* destroy, duty requires that we should preserve, life."

Three negatives in different clauses are sometimes used for particular emphasis; as, "For then shall be great tribulation; such as hath not been from the beginning of the world; *no*, *nor* shall ever be." "But of that day, and that hour, knoweth *no* man, *no*, *not* the angels in heaven."

RULE XXVIII.

Prepositions govern the objective case, or what is equivalent to it; as, "And he said *unto* me, The Lord, *before* whom I walk, will send his angel *with* thee, and prosper thy way."

Sometimes part of a sentence, sometimes a whole one, supplies the place of an objective case; thus, "There was at this time a dispute between our two archbishops, *about* Who should be greatest."—"Earth's highest station ends *in* Here he lies."

RULE XXIX.

Conjunctions connect the same modes, tenses, and persons of verbs; the same cases of nouns and pronouns; and adjectives in the same degree of comparison; thus,—

"*Fairest* and *foremost* of the train that wait

On man's *most dignified* and *happy* state."

"Between *you* and *me*."

"Some men make gain a fountain, whence proceeds

A stream of *liberal* and *heroic* deeds."

"But, ah! what *wish* can prosper, or what *prayer*,

For merchants rich in cargoes of despair! Who drive a loathsome traffic, *gauche* and *span*,

And *buy* the muscles and the bones of man!"

RULE XXX.

Some conjunctions require the subjunctive mode after them; some the indicative.

The subjunctive—to express something conditional, or simply future; thus, "*If* thy brother *trespass* against thee, reprove him; and *if* he *repent*, forgive him." "Love not sleep, *lest* thou come to poverty."

The Indicative—when existing facts and circumstances are implied; thus, "*If* the editor *has* many such letters to produce, his book will be something to talk of." "*Unless* my glass *deceives* me, I have not lost one beauty of my earliest years."

1. Conjunctions cannot properly govern both the subjunctive mode and the indicative in the same sentence, and under the same circumstances: "But this same Cassio, *though* he *speaks* of comfort, yet looks sadly." It ought to be, "*speaks* of comfort."

2. *That* annexed to an injunction, a command, &c., is followed by the subjunctive mode; as, "See *that* no man *render* evil for evil."

3. The conjunction is often omitted, and the order of the sentence inverted; thus, "*Were* any other event, of far inferior moment, *ascertained* by evidence, which made but a distant approach to that which attests the certainty of a life to come; *had* we equal assurance, that, after a very limited though uncertain period, we should be called to migrate into a distant land, from which we were never to return, the intelligence would fill every breast with solicitude." "*Does* he grow weary of power, he abdicates." "*Is* he dissatisfied with his neighbour, he removes." The plain grammatical order would be, "*If* any other event *were* *ascertained*;" "*If* we *had* equal assurance;" "*If* he *grows* weary;" "*If* he *is* dissatisfied."

4. *Were* is frequently used for *would* be, and *had* for *should* have; thus, "*If* *were* (or *would* be) no virtue to bear calamities, if we did not feel them." "The annunciation of life and immortality by the gospel, did it contain no other truth, *were* (or *would* be) sufficient to east all the discoveries of science into shade." "I was much solicited at Norwich not to refuse a bishopric, and had that of Chichester been offered me, I *had* not (or *should* not *have*) refused it."

RULE XXXI.

Conjunctions do not govern the cases of nouns and pronouns; but in comparing with *than* or *as*, the noun or pronoun following it agrees with the verb, or is governed by the verb or a preposition, expressed or understood; thus, "Health is better *than* riches;" "*than* riches *are*." "How much better is it to get wisdom *than* gold!" "*than* to get gold." "In journeying through life, our aims are various *as* the roads we take;" that is, as the roads we take *are*.

Than is used after all adjectives and adverbs in the comparative degree; after the adjective *other*, and the adverbs *otherwise* and *else*.

Some conjunctions are used in pairs: others correlatively with adverbs; and between the respective words a suitable

correspondence should be preserved, so that, in the subsequent member of a sentence, the latter answer correctly to the former: as,

Either—or: "I like to see *either* man or community reforming." "It were rare sailing, if winds and weather were *either* at command or foreseen."

Whether—or: "The time draws on, when not a single burial spot, *whether* on land, or in the spacious sea, but must give back its long-committed dust."

Neither—nor: "The heads of birds are small; so that *neither* the action of their wings, *nor* the progress of their bodies through the air, is retarded."

Though, although—yet, nevertheless: "Though our passage through this world be ever so tempestuous, *yet* we shall arrive at a safe port." "Although the fig-tree blossom not, nor fruit be in the vine; the labour of the olive fail, and the fields yield no meat; the flock be cut off from the fold, and there be no herd in the stalls; *yet* will I rejoice in the God of my salvation."

As—as, As—so: expressing comparisons of equality: thus, "Motion is *as* necessary to the sea, *as* the circulation of the blood to animals."

"*As* no faculty of the mind is more capable of improvement than the memory; so none is more in danger of decay by disuse."

As—so, So—as: comparisons of quality; "As virtue is its own reward, so is vice its own punishment." "In Lapland, the flakes of snow are sometimes so small, *as* to resemble a fine dry powder."

As—so, So—as: comparisons in respect of degree: "As the aged depart from the dignity, so they forfeit the privileges, of gray hairs." "There is no town so small, no place so desert, *as* entirely to preclude the successful cultivation of science."

So—as, So—that: expressing a consequence: thus, "Teach us *so* to number our days, *as* to apply our hearts unto wisdom." "We are so accustomed to the beauties of nature, *that* we neglect to admire the wisdom of their divine Author."

RULE XXXII.

The interjections *O, oh, and ah*, require the objective case of a pronoun in the first person after them; as, "*Ah me!* how fleeting all our joys are found!" but the nominative case in the second person; as "*O thou*, who dry'st the mourner's tears!" "Look down with pity, *oh, ye* pow'rs above!"

OF STYLE.

"Style may be defined to be the particular manner in which we express our conceptions by means of language.

"The qualities of a good style are *perspicuity and ornament*. Perspicuity is, however, the more important quality. It is, indeed, the only quality that is indispensable. No merit, with respect to matter or ornament, can compensate for its absence. By perspicuity, says Quintilian, care is taken not merely that the reader

may understand, but that he cannot fail to understand.

"To write with perspicuity, the primary requisite is, to possess clear ideas. Perspicuity of expression, then, demands careful attention to two things; 1st, the choice of single words and phrases; and 2d, the conformable arrangement of them in periods or sentences. Perspicuity in the choice of words and phrases implies *purity and propriety*. Their apt arrangement is founded on the rules of syntax, and the natural associations of the ideas.

"To write with *grammatical purity*, three things are essential: 1st, that all the words be of that language; 2d, that they be arranged according to the rules of its syntax; and 3d, that they express the precise meaning which good usage has affixed to them.

PROPRIETY.

"It is a species of impropriety, producing ambiguity, to employ a word or a phrase susceptible of different meanings; or to use the same word or phrase successively in different senses; thus, "Denmark and Norway were held together by *no common tie*," may denote either that they were not united by any common tie, or that they were held together by an uncommon one.

"Inconsistent words or phrases are highly improper; as, 'I had like to have gotten *one or two broken heads*;' instead of 'I *once or twice* narrowly escaped getting my head broken.'

"*Vulgarisms* are a species of impropriety to be avoided.

"*Technical* words and phrases, being the dialect of a particular class, and seldom understood by the generality of readers, should not be employed without discretion.

—'The *machinery* of the mind works through a *roughness of wheel* and a *stubbornness of spring* with jarring and confounding attrition.'

Obscure and unintelligible expressions are improper:—"Yet when that flood in its own depths was drown'd."

One great source of these is the *affectation of excellence or fine writing*:—"Personifications, however rich their depletions and unconstrained their latitude,—analogies, however imposing the objects of parallel, and the media of comparison,—can never expose the consequences of sin to the extent of fact, or the range of demonstration."

Nearly allied to the unintelligible are the *marvellous, the puerile, and the learned*.

Marvellous.—"My wound is great, because it is so small."

The bombastical nonsense of which was thus properly exposed by the Duke of Buckingham:—"It would be *greater* were it *none at all*."

Puerile.—"From harmony, from heavenly harmony,

This universal frame began;
From harmony to harmony,
Through all the compass of the notes it ran,
The diapason closing full in man."

A Compendious English Grammar.

Learned.—“Nothing is there to come, and nothing past,
But an eternal now does always last.”

“The want of precision is a great impropriety. By precision it is understood that the words and phrases employed express the writer’s meaning, and nothing more. To attain this quality, particular care must be taken to discriminate accurately the words and phrases termed *synonymous*; and not to accumulate, in the description of the same object or circumstances, either these or such as include the signification of each other.

“*Obsolete* or *affected* language, *foreign* idioms and words, *provincial* expressions, &c., are inconsistent with purity and propriety:—‘*Prevent* us, O Lord, in all our doings;’ ‘Deal not with us *after* our sins;’ ‘*The quick and the dead*,’ might be good English when the Liturgy was composed; but no one would now use these words in the same sense.

“*Established* terms, however, are not to be proscribed, even though their use may involve circumstantial impropriety. We may still speak of *sun-rise* and *sun-set*, though we know that the sun neither *rises* nor *sets*.

“Propriety requires careful attention to the use of the different kinds of figures.

PERSPICUITY AND ORNAMENT.

CONSTRUCTION OF SENTENCES. — CLEARNESS OF ARRANGEMENT. — GENERAL RULES.

Rule 1.—“The words and members most nearly related in sense should be placed as near as possible to each other; that their mutual relation may appear to the greatest advantage.”

“What nearly escapes the naked eye, when viewed through a microscope, has an inconceivable fineness and beauty.” In this sentence, the verb *has*, being closely connected with *what nearly escapes the naked eye*, ought to have been placed immediately after it; thus, “What nearly escapes the naked eye, *has*, when viewed through a microscope, inconceivable fineness and beauty.”

Rule 2.—“A circumstance ought never to be placed between two capital members; since by such a situation, it is doubtful to which it belongs.”

“Though our brother is upon the rack, so long as *we ourselves* are at ease, our senses will never inform us of what he suffers.”

But, when interjected between parts of the member to which it belongs, ambiguity is avoided, and the capital members are kept distinct: thus, “Though our brother is upon the rack, our senses, so long as *we ourselves* are at ease, will never inform us of what he suffers.”

Rule 3.—“Words expressing things connected in thought ought generally to be placed contiguous, even though their separation would not cause ambiguity.”

“When the woman has made her own choice, for form’s sake, she sends a *conge*

d’elire to her friends.” It ought to have stood thus: “When the woman has made her own choice, she sends, for form’s sake, a *conge d’elire* to her friends.”

Rule 4.—“Great attention is required to the proper disposition of the relatives *who*, *which*, *what*, and of all connective particles. A trivial error may obscure the meaning of a whole sentence; and even where the meaning is intelligible, yet if these relatives and particles are misplaced, we always find something disjointed in the construction.”

“It is folly to pretend to arm ourselves against the accidents of life, by heaping up treasures, which nothing can protect us against, but the good providence of our heavenly Father.” *Which* generally refers grammatically to the immediately preceding noun, which here is *treasures*; and this would make nonsense of the whole period. The sentence should have been arranged thus: “It is folly to pretend, by heaping up treasures, to arm ourselves against the accidents of life.”

Rule 5.—“When different things have relation to each other, with respect to the order of time, place, cause, and effect; a corresponding order should be observed in assigning them their position in the sentence.”

“The houses of these strange people are mere pigeon-houses, perched on poles, with a notched stick as the sole means of egress and ingress;” correctly, “as the sole means of ingress and egress.”

Rule 6.—“Circumstances should not immediately follow one another, but should be interspersed among the principal words on which they depend, or to which they refer. This is happily effected thus:—

“If, whilst they profess only to please, they secretly advise and give instruction, they may now perhaps, as well as formerly, be deemed, with justice, the best and most honourable among authors.’ Let us examine the effect of a different arrangement: ‘If, whilst they profess to please only, they advise and give instruction secretly, they may be deemed the best and most honourable among authors, with justice, perhaps, now as well as formerly.’ Here we have precisely the same words, and the same sense; but in consequence of the circumstances being so intermingled as to clog the capital words, the whole is perplexed, and devoid of grace and skill.”

OF UNITY.

Rule 1. “A sentence should contain one leading proposition; it may embrace several members or circumstances, provided they be made subservient to one predominating object or principle. The unity of a sentence is destroyed chiefly by the introduction of extraneous words and ideas, and the combination of sentiments naturally so distinct that they ought to be expressed in separate sentences.”

“He was much pleased with the mode of living of the inhabitants, a handsome race of people, which, in many of the conveniences of life, resembles that of the

A Compendious English Grammar.

Europeans." The unity of this sentence is destroyed by the misplaced description of the people.

Rule 2. — "It is obvious, that objects not having intimate connection, should not be associated in the same sentence." The following is a violation of this rule :—

"In this uneasy state both of his public and private life, Cicero was oppressed by a new and cruel affliction, the death of his beloved daughter Tullia; which happened soon after her divorce from Dolabella, whose manners and humours were entirely disagreeable to her."

Rule 3. — "During the course of the sentence, the scene should be changed as little as possible." In the following example, the frequent change of scene forms a jumble of objects, which it is very difficult to comprehend under one view :—

"This vast and gloomy landscape, scarcely animated by a grave and taciturn population, is relieved, but at long intervals, by the clusters of oaks, which surround the scattered habitations, where the peasant and his family live, pell-mell, with a part of the domestic animals, which are fattened on the fruit of the trees planted round their dwellings; flocks of sheep wandering among the turfs under the care of shepherds covered with their fleece, mounted on high stilts; and who might be taken at a distance for the Lestrignons, whom some learned men place in this country; such is the aspect of the Upper Landes."

Rule 4. — "One principal agent should lead the sentence, and one species of construction generally prevail in it; an unnecessary mixture of active, passive, and neuter phraseologies being carefully avoided."

"The sultan being dangerously wounded, they carried him to his tent; and, upon hearing of the defeat of his troops, he was put into a litter, which transported him to a place of safety." "It should be an indispensable rule in life, to contract our desires to our present condition; and, whatever may be our expectations, we should live within the compass of what we actually possess." These sentences might be improved thus :— "The sultan, being dangerously wounded, was carried to his tent; and, on the defeat of his troops, was transported in a litter to a place of safety."

"It should be an indispensable rule in life, to contract our desires to our present condition, and, whatever are our expectations, to live within the compass of what we actually possess."

Rule 5. — "Unnecessary parentheses are especially to be avoided."

"Aware of the dangers which an immense influx of strangers, irritated by the inflammatory appeals of their factious leaders, (who, under the pretence of promoting parliamentary reform, have been for a length of time past agitating the minds of the labouring classes of society,) portended, the conservators of the public tranquillity took every precaution adequate to the occasion." After hanging the usual time, the body was cut down, and sold to a surgeon (formerly in France

the bodies of criminals, after execution, were a part of the hangman's perquisites, who had liberty to dispose of them as he thought proper), who ordered it to be removed to his house for dissection."

"They should not, as in the former of these examples, be so long as to disturb the reader in resuming the train of the sentiment, or oblige him to review what precedes; nor should they, as in the latter, be interjected between words intimately connected; but should arise naturally out of the subject, and yet be so far unconnected with it, that the sentiment inclosed might be removed without destroying the general sense of the period."

Rule 6. — "Sentences should never be extended beyond what seems to be their natural close. Inattention to this rule is destructive both of strength and unity."

"Reason is the glory of human nature, and the chief eminence by which we are raised above our-fellow creatures the brutes, in this lower world." Here the word *brutes* forms the natural close; what follows, only enervates the thought.

OF STRENGTH.

"The strength of a sentence consists in such a selection and position of the words, and arrangement of the members, as are the most conducive to the full and explicit expression of the intended meaning."

Rule 1. — "A sentence should be divested of all redundant words and members; and the relation of unnecessary circumstances, and such as are unimportant, or already implied, is to be avoided."

In the following sentences the words in Italics are superfluous :— "A great part of the population consists of small erratic hordes, who live in a migratory state, and have no permanent habitation." "The view of the river is intercepted by an intervening hill." "This building contains, besides the theatre itself, which wants repair, a concert-room, and many vast apartments."

"Particular care is requisite in the use of copulatives, relatives, and all the words employed either in connection or transition. These have been named the joints and hinges of language. Its gracefulness and strength, therefore, depend, in a great measure, on the manner in which they are employed; and the less conspicuous this is, the closer will be the union of the various parts, and the more easily will the reader glide from one word, clause, or member, to another."

Rule 2. — "What is termed *splitting of particles*, that is, the separation of a preposition, or other part of speech, from its regimen, ought to be as much as possible avoided :—

"Above all, cultivate your mind; supply it with those rich materials of knowledge, which no earthly power can bereave you of." "The distance and strength of Russia prevented him from, for the present, pushing his complaints to extremity." "It has the (in such a matter) valuable sanction of Josephus."

A Compendious English Grammar.

"In such instances, a degree of dissatisfaction arises, from the violent separation of two things which ought to be intimately united. But it is not always easy to avoid such separations; nor, perhaps, is it always necessary; yet, if many words intervene, suspense, if not ambiguity, must be the consequence."

Rule 3.—"The more important words should be so placed as to make the strongest impression; the first and last words of a sentence are generally the most conspicuous."

"Great animation arises from placing an important word at the beginning; thus, '*Sunk* are thy bowers in shapeless ruin all.' When, however, the leading object is not only to give weight to the sentiment, but also to sustain the attention, or suspend the curiosity, important words may be placed advantageously at the close: thus, 'Happy the man who, void of cares and strife, in silken or in leathern purse retains a *splendid shilling*.'"

Rule 4.—"The strongest part of the thought, or that which forms the result, should come the last, for which reason, all circumstances, and all conditional members, ought to be placed in the middle or at the beginning of the sentence."

"Thus if, instead of saying, 'Woman certainly is the joy of life, rationally speaking,' we say, 'Rationally speaking, woman is certainly the joy of life,' we add to the force of the observation, while we improve the sound."

Rule 5.—"The plain and grammatical order of a sentence, may be deemed the most consistent with ease and simplicity. Inversion, or the disposition of words out of that order, is a branch of ornament combining sound, sense, and effect; and is employed chiefly in works addressed to the passions, emotions, or imagination. It should not, however, be indulged, but to reach some beauty, or produce some effect, not attainable by the usual order." By a plain grammatical order, the effect of the following sentence would have been destroyed:—

"Upon them (the European civil servants of the East India Company) in consequence devolve the duties of dispensing justice to millions of people, of various languages, manners, usages, and religions; of administering a vast and complicated system of revenue, throughout districts equal in extent to some of the most considerable kingdoms in Europe; and of maintaining civil order in one of the most populous and litigious regions in the world."

Rule 6.—"Though a sentence should not, in general, be concluded with an inconsiderable word, or with a particle, as, *by, from, about, of, with, up, to, &c.*; yet certain words included in this vague term, if particularly significant, may with great propriety terminate a sentence:" thus,—

"Not many days ago, you saw her young, beautiful, virtuous, and happy: ye who are parents will judge of my felicity *then*: ye will judge of my affliction *now*." "As in the next world, so in this, the only

solid blessings are owing to the goodness of the mind, not to the extent of the capacity; friendship *here* is an emanation from the same source as beatitude *there*."

"Compound verbs, such as *bring-about, lay-hold-of, clear-up*, and others of the same kind, are ungraceful conclusions of a period: if, instead of these, a simple verb can be employed, the sentence is always terminated with strength. Even the pronoun *it*, especially when joined with a preposition, cannot gracefully conclude a sentence."

"Sentences are sometimes too long, at other times too short and abrupt. A long period, perfectly clear and well constructed, if not so prolonged as to exhaust the patience and attention of the reader, is always beautiful and pleasant; but the extreme difficulty of constructing such periods, renders them often feeble, ungraceful, and obscure."

"Lastly, the strength and beauty of a sentence may be promoted by a judicious use of the figures *incrementum, climax, and antithesis*, and of figurative language in general."

OF RHETORICAL FIGURES.

"A figure is the expression of a sentiment in a manner different from the ordinary way, to render the discourse more emphatic and ornamental.

1. "*Simile* is that by which, for ornament or illustration, we make formal comparison:" thus, "All flesh is *as grass*, and all the glory of man *as the flower of the field*."

"Strictly speaking, the *simile* is not a figure, as *there* is no change of language.

2. "A *metaphor* is a simile without formal comparison:" thus,—

"An idler is *a watch* that wants both hands;

As useless if it goes, as when it stands."

3. "An *allegory* is a continuation of metaphorical language through several sentences:" thus,—

"'Tis done! dread Winter spreads his latest glooms,

And reigns tremendous o'er the conquer'd year.

Behold, fond man;
See here thy pictur'd life; pass some few years,

Thy flowering Spring, thy Summer's ardent strength,

Thy sober Autumn fading into age,
And pale concluding Winter comes at last,

And shuts the scene."

4. "*Catachresis*, or abuse of words, is any harsh trope, but commonly an overstrained metaphor;" as,—

"Whence the scar'd owl, on pinions gray,
Down the lone valley sails away."

5. "*Hyperbole* is an excess of figurative, and generally of metaphorical language;" as, "*Rivers* of blood, and *hills* of slain."

6. "*Trope* is a trope in which the sign and the thing signified are directly contrary; in which we speak contrarily to what we mean, and are so to be understood:" thus,—

A Compendious English Grammar.

"After all, nothing can be clearer, than that an incessant round of diversion, and the more lively and hurrying the better, is the most important end of life."

7. "*Antithesis* compares things contrary or different, so as to render them remarkable by the contrast."

"Howard visited all Europe:—not to survey the sumptuousness of palaces, or the stateliness of temples; not to make accurate measurements of the remains of ancient grandeur, or to form a scale of the curiosity of modern art; not to collect medals, or collate manuscripts:—but, to dive into the depths of dungeons; to plunge into the infection of hospitals; to survey the mansions of sorrow and pain; to take the gauge and dimensions of misery, depression, and contempt; to remember the forgotten, to attend to the neglected, to visit the forsaken, and to collate and compare the distresses of all men in all countries."

8. "*Metonymy* is the putting the name of one thing for that of another allied to it, or dependent on it:" thus,—

Cause for effect:—

"Again unmann'd, a shower of sorrow shed,
And streaming grief his faded cheek

Effect for cause:—

"If mischief befall him by the way, then will ye bring down my gray hairs with sorrow to the grave."

Subject for quality:—

"The serpent blended with the dove;
Wisdom with meek simplicity."

Quality for subject:—

"Here garrulous old age winds up his tale,
And jovial youth hears not the voice of mirth."

A proper name for a common one: as,—

"May there not be Sir Isaac Newtons in every science?"

Badge for office: as, the crown for royalty; the mitre for the priesthood; the sword for the military occupation; and the gown for the professions, law, physic, and divinity.

Place for inhabitants:—

"Be good!—and let Heaven answer for the rest."

Container for thing contained:—

"The cups that cheer but not inebriate."

General for army, &c.

9. *Synecdoche*, or *Comprehension*, is similar to metonymy: it puts

The whole for a part:—

"The world has gone after him."

A part for the whole:—

"Heaven speed the canvas gallantly unfurl'd,
To furnish and accommodate a world."

The matter for the materiate: as, hemp for halter; steel for sword, knife, razor; oak for ship, &c.

General for special, and special for general, &c.

10. *Prosopopœia*, or *Personification*, is when an absent or a dead friend is introduced, speaking or spoken to; or when life, speech, action, or feeling is attributed to an inanimate or irrational being: a most useful figure, when properly introduced and judiciously managed: thus,—

"Hear the words of *Prudence*, give heed unto her counsels, and store them in thy heart: her maxims are universal, and all the virtues lean upon her: she is the guide and mistress of human life."

11. By *Apostrophe*, the speaker suddenly breaks through the chain of his discourse, and, in a feeling manner, addresses the living or the dead, or even inanimate nature.

In the last volume of his travels, the late Dr. Edward Clarke (than whom few men saw more of the world) thus apostrophizes his country:—

"Oh, England! decent abode of comfort, and cleanliness, and decorum! Oh, blessed asylum of all that is worth having upon earth!—Oh, sanctuary of religion, and of liberty, for the whole civilised world!—It is only in viewing the state of other countries, that thy advantage can be duly estimated!—May thy sons who have 'fought the good fight, but know and guard what they possess in thee!—Oh, land of happy firesides, clean hearths, and domestic peace; of filial piety, and parental love, and conjugal joy; the cradle of heroes, the school of sages, the temple of law, the altar of faith, the asylum of innocence, the bulwark of private security and of public honour!

"Where'er I roam, whatever realms to see,
My heart, untravel'd, fondly turns to thee."

12. *Incrementum* is a species of amplification, according to which the sense advances without a strict climax; as,—

"The cloud-eapp'd towers, the gorgeous palaces,
The solemn temples, the great globe Yea, all which it inhabit, shall dissolve,
And, like the baseless fabric of a vision,
Leave not a wreck behind."

"For I am persuaded that neither death nor life; nor angels, nor principalities, nor powers; nor things present, nor things to come; nor height, nor depth, nor any other creature; shall be able to separate us from the love of God, which is in Christ Jesus our Lord."

13. The strict *climax* is a kind of repetition; in which the expression ending the first member of a sentence begins the second; that ending the second, the third; and so on till the sentence is complete. There is much of strength and beauty in this figure, when the several steps rise naturally, and are closely connected.

"As we consider ourselves not only as sensitive, but as rational beings; not only as rational, but social; not only as social, but immortal; whatever violates our nature in any of these respects, cannot afford us true pleasure."

*Words spelled and pronounced exactly alike, but differing widely in Signification.*

Arms, *pl. s.* all sorts of weapons of war; a state of hostility

Arms, *pl. s.* ensigns armorial

Arms, *pl. of arm,* a limb

"The Duchess of Kingston was remarkable for having a high sense of her own dignity. Being one day detained in her carriage, by the unloading of a cart of coals, in a very narrow street, she leaned with both her arms upon the door, and said to the man, 'How dare you, sirrah, stop a woman of quality in the street?' 'Woman of quality?' replied the man. 'Yes, fellow,' rejoined her grace; 'don't you see my arms upon my carriage?' 'Yes,' replied he, 'I do; and a pair of coarse arms they are!'"

Calf, *s.* the young of a cow

Calf, *s.* a blockhead

Calf, *s.* the thick part of the leg

"Harry, I cannot think," says Dick,

"What makes my ankles grow so thick."

"You do not recollect," says Harry,

"How great a calf they have to carry!"

Cause, *s.* that through which anything happens

Cause, *s.* a subject of litigation. See Effects.

Chal'lenge, *v. a.* to except to, object to

Chal'lenge, *v. a.* to invite to fight a duel

"An Irish bookseller, previously to the trial of a cause in which he was defendant, was informed by his counsel, that if there were any of the jury to whom he had any personal objections, he might legally chal'lenge them; that is, oppose their being jurors. 'Faith, and so I will,' replied he; 'if they do not bring me off handsomely, I will chal'lenge every man of them.'"

Cor'poral, *a.* material, pertaining to the body

Cor'poral, *s.* the lowest officer of the infantry

"A soldier in a newly-raised Irish corps observed to his comrade, that a corporal was to be dismissed the regiment. 'Faith and indeed!' replied the other: 'I hope it is the corporal so troublesome in our company.' 'What's his name?' inquired the soldier. 'Why, Corporal Punishment, honey, to be sure!'"

Crown, *s.* an ornament worn on the heads of kings, &c.

Crown, *s.* a coin of five shillings' value

Cry, *v. n.* to weep

Cry, *v. a.* to proclaim

"A judge did once his tipstaff call,

And say, 'Sir, I desire

You go forthwith and search the hall,

And send me in the crier.'

'And search, my lord, in vain I may,'

The tipstaff gravely said:

'The crier cannot cry to-day,

Because his wife is dead.'"

Dry, *a.* free from moisture

Dry, *a.* plain; hard, severe

"The reverend Doctors Hardy and Macknight were colleagues in the Old Church of Edinburgh. One Sunday, when it was Dr. Macknight's turn to preach, it happened that he had got drenched by a heavy shower, and was standing before the session-room fire drying his clothes, when Dr. Hardy came in, whom he requested to take his place, as he had escaped the rain. 'No, sir,' replied Hardy, 'preach yourself; you will be dry enough in the pulpit.'"

Effects', *s.* the production of operating causes

Effects', *s.* goods and chattels

"An attorney having died in low circumstances, one of his friends observed that he had left but few effects. 'That is not much to be wondered at,' said another; 'for he had but few causes.'"

End, *s.* intent, purpose

End, *s.* conclusion

"Tom praised his friend, who'd changed his

For binding fast himself and Kate [state,

In union so divine.

'Wedlock's the end of life,' he cried:

'Too true, alas!' said Jack, and sigh'd,—

'T will be the end of mine.'"

## English Verbal Distinctions.

Felt, *past tense of feel*Felt, *s.* stuff for making hats

“Mr. Bannister, passing by a house which had been almost consumed by fire, inquired whose it was. Being told it was a hatter’s, ‘Ah,’ said he, ‘then the loss will be felt.’”

General, *a.* public, extensiveGeneral, *s.* one that commands an army

“When accounts of Buonaparte’s astonishing successes in Italy arrived, a young nobleman observed, that he had gained most of those advantages through the assistance of some newly-created generals. ‘I know of no general he has created lately, but one,’ said a gentleman present, ‘and that is *General Consternation*.’”

Hastings, *s.* peas that come in earlyHastings, *s.* a sea-port town in SussexHead, *s.* that part of an animal which contains the brainHead, *s.* principal topic

“When the infamous Judge Jefferies was told that the Prince of Orange would very soon land, and it was reported that a manifesto, stating his inducements, objects, &c., was already written, ‘Pray, my lord,’ said a gentleman present, ‘what do you think will be the *heads* of this manifesto?’ ‘*Mine*,’ replied he, ‘will be one.’”

Keep, *v. a.* to retainKeep, *v. a.* to be confined to

“A drunken fellow, having sold all his goods except a feather-bed, at last made away with that, too; and, being reproved by some of his friends for his conduct, he replied, ‘As I am very well, thank God, why should I *keep my bed*?’”

Left, *a.* the opposite of rightLeft, *past part. of leave*; remaining behindOn a *Left-handed Writing-Master*.

“Though Nature thee of thy right hand bereft,

Right well thou writest with the hand that’s

Maggot, *s.* a small grubMaggot, *s.* a whim, an odd fancy

“Swift, dining one day with a lady, complained that the leg of mutton, a dish at table, was full of *maggots*. ‘Not half so full as your *head*, doctor,’ replied the lady, drily. ‘The dean was silent, and did not rally again during the evening.’”

Measure, *s.* a vessel to measure withMeasure, *s.* a mean of action; proceedingOrder, *s.* method, proper state, ruleOrder, *s.* a mandate, a commandOrder, *s.* the badge of a society distinguished by some mark of honour

“When the late illustrious Chevalier Taylor was enumerating the honours he had received from the different princes of Europe, and the *orders* with which he had been dignified, a gentleman remarked that he had not named the King of Prussia; adding, ‘I suppose, sir, he never gave you any *order*.’ You mistake, sir,” replied the chevalier: ‘he gave me a very *re-emptory order* to quit his dominions.’”

Painter, *s.* one who paintsPainter, *s.* a rope for fastening a boat to a ship, or a wharf

“A painter was employed in painting a West Indian in the Thames, on a stage suspended under her stern. The captain, who had just got into the boat alongside, to go ashore, ordered the cabin-boy to let go the *painter* (the rope that held the boat). The boy instantly went aft, and let go the rope by which the painter’s stage was held. The captain, surprised at the boy’s delay, cried out, ‘Confound you for a lazy dog! why don’t you let go the painter?’ ‘He’s gone, sir,’ replied the boy, ‘pots and all!’”

Paste, *s.* a cement made of flour and waterPaste, *s.* an artificial compound resembling precious stones

“The late John Palmer, the comedian, whose father was a bill-sticker, and who had occasionally practised in the same humble occupation himself, strutting one evening in the green-room of Drury-Lane Theatre, in a pair of glittering buckles, a gentleman present remarked, that they greatly resembled diamonds. ‘Sir,’ said Palmer, with warmth, ‘I would have you to know, that I never wear anything but diamonds.’ ‘I ask your pardon,’ replied the gentleman; ‘I remember the time when you wore nothing but *paste*.’ This produced a loud laugh, which was heightened by Larson’s joggling him on the elbow, and drily saying, ‘Jack, why don’t you *stick him against the wall*?’”

Promising, *a.* giving hopes of some future excellencePromising, *part.* making promises

“Of the late Earl of —, who, when young, was noted for cajoling his creditors with a future pay-day, it was observed by one of his friends, that it was a pity that fortune should neglect so *promising* a young gentleman.”

Raise, *v. a.* to increase, advanceRaise, *v. a.* to obtain, procure

“A farmer, in the neighbourhood of Doncaster, was once met by his landlord, who told him he had some thoughts of *raising* his rent; to which the farmer replied, ‘I am very much obliged to you, sir; for indeed I cannot *raise* it myself.’”

Spirits, *s. pl.* inflammable distilled liquorsSpirits, *s. pl.* vigour or cheerfulness of mind

“‘Is my wife out of *spirits*?’ said John,

with a sigh,

As her voice of a tempest gave warning:

‘Quite out, sir, indeed,’ said the maid in

reply; [Ing.]

‘For she *finished the bottle* this morn-Strike-out, *v. a.* to effaceStrike-out, *v. a.* to bring to light

“When Woodward first acted Sir John Brute, Garrick was induced by curiosity, or perhaps jealousy, to be present. A few days afterwards they met; when Woodward asked Garrick how he liked him in the part, adding, ‘I think I *struck out* some beauties in it.’ ‘I think,’ said Garrick, ‘you *struck out ALL* the beauties in it.’”

Sub'ject, *s.* a groundwork for reflection, de-  
liberation, or discourse

Subject, *s.* one that lives under the dominion  
of another

"Daniel Purcell, the famous punster, being  
desired one night, in company, to make a  
pun extempore, asked, 'Upon what sub-  
ject?' 'The king,' was the answer. 'O,  
sir,' replied Daniel, 'the king is not a  
subject.'"

Take, *v. a.* to receive

Take, *v. a.* to bear, suffer with impunity

"A porter passing near Temple Bar, with a  
load on his shoulder, having unintentionally  
jostled a man going that way, the fellow  
gave him a violent box on the ear; on  
which a gentleman that saw it exclaimed,  
'Why, my friend, will you *take that*?—  
'Take it!' replied the porter, rubbing his  
cheek; 'didn't you see him *give* it me?'"

Take in, *v. a.* to receive hospitably

Take in, *v. a.* to cheat, impose on

"Quin, upon his first going to Bath, found  
he was charged most exorbitantly for every  
thing; and, at the end of a week, com-  
plained to Nash, who had invited him thither,  
as the cheapest place in England for  
a man of taste and a *bon-vivant*. The  
master of the ceremonies, who loved his  
joke, and knew that Quin also relished a  
pun, replied, 'They have acted by you on  
truly Christian principles.' 'How so?'  
says Quin. 'Why,' resumed Nash, 'you  
were a *stranger*, and they *took you in*.—  
'Ay,' rejoined Quin, 'but they have  
*fleece* me instead of *clothing* me.'"

Testament, *s.* a will

Testament, *s.* the latter portion of the Holy  
Scriptures

"A countryman, going into the office in  
which the wills are kept at Doctors' Com-  
mons, and, gazing at the large volumes on  
the shelves, asked whether they were all  
*bibles*. 'No, sir,' answered one of the  
clerks; 'they are *testaments*.'"

Transport', *v.* to carry into banishment

Transport', *v.* to put into ecstacy

Up, *ad.* in a state of insurrection

Up, *ad.* out of bed

"During the rebellion in Scotland, the Earl  
of Chesterfield was in Ireland; and one  
morning, when it was reported that the  
Roman Catholics were about to rise, a  
gentleman ran very abruptly into his cham-  
ber. 'My lord, my lord, we are undone!'  
says he; 'all Ireland is expected to be *up*  
immediately.' 'Why, what o'clock is it?'  
says the earl. 'Then, my lord,' answered  
the gentleman. 'Then I will *get up* my-  
self,' says his lordship, very calmly; 'for  
I think every man ought to be *up* at ten  
o'clock.'"

Watch, *s.* a small portable machine for mea-  
suring time [detect or prevent]

Watch, *v. a.* to guard, to observe in order to  
"He who a *watch* would wear two things  
must do:

Pocket his *watch*, and watch his *pocket* too."

Amicus certus in re incertâ cernitur. A

real friend is discovered in a trying case

Amor patriæ. The love of our country

Anglicè. In English

Anguis in herbâ. A snake in the grass

Animum rege, qui nisi pareat imperat. Go-

vern your mind, which, unless it obeys,

will command

An nesels longas regibus esse manus? Do

you not know that kings have long hands?

Anno Domini (A. D.) In the year of our

Lord [world

Anno Mundi (A. M.) In the year of the

Annus Mirabilis. The year of wonders.—

A poem of Dryden's, so called in commem-

oration of the destructive fire of London

Antiquâ homo virtute ac fide. A man of

ancient virtue and fidelity

A posteriori. From the effect to the cause

A priori. From the cause to the effect

Arbiter elegantiarum. Master of the cere-

Arana imperii. State secrets [monies

Argumentum ad hominem. An argument

to the man

Argumentum baculum. Club law

Ars est celare artem. The perfection of

art is to conceal art

Asperius nihil est humili cum surgit in al-

tum. Set a beggar on horseback, and

he'll ride to the devil

Audendo magnus tegitur timor. Fear is

often concealed under a show of daring

Audentes fortuna juvat. A faint heart never

won a fair lady

Audi alteram partem. Hear the other party

Aura popularis. The gale of popular favour

Auri sacra fames. The accursed appetite

for gold [Cæsar or nobody

Aut Cæsar aut nullus. He will either be

A vinculo matrimonii. From the bond or

tie of marriage

BELLUM internecivum. A war of mutual

extermination

Bonâ fide. In good faith; in reality

Bonus nocet, quisquis pepererit malis. He

injures the good who spares the bad

Brevis esse laboro, obscurus fio. I labour

to be concise, and I become obscure

Brutum fulmen. A harmless thunderbolt

CÆCUS iter monstrare vult. A blind man

wishes to show the road

coëthics loquendi—scribendi, A rage for

talking—scribbling

Cantabit vacuus coram latrone viator. The

traveller with an empty purse may sing

before the footpad

Caput mortuum. The worthless remains

Causa latet, vis est notissima. The cause is

concealed, the effect is notorious

Caveat actor—caveat emptor. Let the

doer—let the buyer beware [quence

Cedant arma togæ. Let arms yield to elo-

cede Deo. Submit to Providence

Certiorari. To be made more certain

Cito maturum, cito putridum. Soon ripe,

soon rotten

Comes jucundus in via pro vehiculo est.

An agreeable companion upon the road is

as good as a coach

Communia propriè dicere. To express

common things with propriety

Commune bonum. A common good

Communis annis. One year with another

Compos mentis. A man of sane mind

Concordia discors. A jarring concord

Contra bonos mores. Against good morals

Contra stimulum calcas. You kick against

a spur [King

Coram Domino Rege. Before our Lord the

Corpus delicti. The body of the crime

Corruptio optimi pessima. The abuse of the

best thing is the worst

Credat Judæus Apella. Let the circumcised

Jew believe that

Crescit amor nummi quantum ipsa pecunia

erescit. The love of pelf increases with

the pelf

Crimen læsæ majestatis. High treason

Cucullus non facit monachum. It is not

the cowl that makes the friar

Proverbs, Terms, and Phrases.

Cui bono? Cui malo! To what good—to what evil, will it tend!

Curæ leves loquuntur, ingentes stupent. Light griefs are loquacious; deep sorrow has no tongue

Currente calamo. With a running pen

Custos rotularum. The keeper of the rolls and records [is not to the swift]

Curus [or, cursus] non est levis. The race

DA locum mellioribus. Give place to your betters

Dammant quod non intelligunt. They condemn what they do not understand

Data. Things given or granted

Desideratum. A thing desired [right time]

Desperare in loco. To play the fool at the

Desunt cætera. The remainder is wanting

Detur digniori. Let it be given to the more worthy [of God]

Deo volente (D. V.) With the permission

Deus nobis hæc otia fecit. God has given us this leisure

Dies faustus—inaustus. A lucky—an un-lucky

Dii penates. Household gods [lucky day]

Dijecta membra poetæ. The scattered remains of the poet

Discite justitiam moniti, et non temnere divos. Be admonished to learn justice and reverence for the gods

Divide et impera. Divide and govern

Domus et placens uxor. Thy house and pleasing wife

Dulce et decorum est pro patriâ mori. It is sweet and glorious to die for one's country [aloud]

Dum tacent clamant. Their silence speaks

Dum vitant stulti vitia, in contraria currunt. Fools are ever in extremes

Dum vivimus, vivamus. Let us live while

Durante vitâ. During life [we live]

EA sub oculis posita negligimus: proximorum incuriosi, longinqua sectamur. We neglect the things under our noses, and, regardless of what is within our reach, pursue what is remote

Ece homo. Behold the man

E flamma cibum petere. To obtain a livelihood by desperate means

Eripuit fulmen cælo, mox sceptrâ tyrannus. He first snatched the thunderbolt from Jove, and then the sceptre from kings. (Thurgot's motto for Dr. Franklin)

Est nodus in rebus, sunt certi denique fines, quos ultra citraque nequit consistere rectum. There is a medium in all things, and there are certain limits, on either side of which rectitude cannot exist

Eso perpetua. Be thou perpetual

Esuriente leoni ex ore exulperè prædam. To tear the prey from the mouth of a hungry lion

Et sic de similibus, de cæteris. And so of the like—of the rest

Ex cathedrâ. From the chair

Excerpta. Extracts [mitted]

Ex concessio. From what has been ad-

Ex curiâ. Out of court [way of example]

Exempli gratiâ (E. g., and Ex gr.) By

Ex facto jus oritur. The law arises out of the fact [thing]

Ex nihilo nihil fit. Nothing produces no-

Ex officio. By virtue of his office

Ex parte. On one part

Ex pede Herculum. Judge of the size of the statue of Hercules by the foot

Experientia stultos docet. Experience makes fools wise

Experimentum crucis. A decisive experiment

Experto crede. Believe an experienced man

Expertus metuit. The man of experience dreads it

Ex tempore. Out of hand—without study

FACETIARUM apud præpotentes in longum memoria est. The powerful hold in long remembrance an ill-timed pleasantry (those whom it stains)

Facinus quos inquinat aequat. Guilt levels

Fac simile. Do the like: an engraved resemblance of hand-writing

Fæx populi. The dregs of the people

Fallit enim vitium specie virtutis et umbrâ. Vice deceives under the shape and shadow of virtue [strength in her progress]

Fama vires acquirit eundo. Fame acquires

Fas est et ab hoste doceri. It is allowable to derive instruction even from an enemy

Felices ter et amplius quos irrupta tenet copula. Thrice happy they who are bound together by indissoluble ties

Felix quem faciunt aliena pericula cantum. He is happy who can learn prudence from the dangers of others

Felix qui potuit rerum cognoscere causas. Happy is the man who is able to understand the causes of things

Felo de se. A suicide

Feræ naturæ. Animals of a wild nature

Fere libenter homines id quod volunt credunt. Men readily believe what they wish to be true

Fiat justitia, ruat cælum. Let justice be done, though the heavens should fall

Filius nullius. The son of nobody; a bastard

Flagrante bello. During hostilities

Fœcundi calices quem non fecere disertum? Whom has not the inspiring bowl made eloquent? [bold]

Fortes fortuna juvat. Fortune favours the

Fortuna multis dat nimium, nulli satis. To many fortune gives too much, to nobody enough [consume food]

Fruges consumere nati. Men born only to

Fuit illum. Troy was, but is no more

GENUS irritabile vatum. The irritable tribe of poets

Gloria quanta libet quid erit, si sola gloria est. Praise without profit, puts little in the pocket

Gratis anhelans, multa agendo nihil agens. Out of breath to no purpose, and very busy about nothing

Gratum est quod patriæ civem populoque dedisti. It is agreeable to have given a citizen to the country and the state

Grave virus munditiæ pepulit. The virulent poison has corroded the healthy part

Gravis ira regum semper. The anger of kings is always terrible

EX.—I DARE NOT TO WALK SO FAST, LEST I SHOULD PERSPIRE TOO FREELY.

KEY.—I DARE NOT WALK SO FAST, LEST I SHOULD PERSPIRE TOO FREELY.

Proverbs, Terms, and Phrases.

Gutta cavat lapidem, non vi sed sæpe cadendo. The drop hollows the stone, not by the force, but the frequency of its fall

HÆREDIS stertus sub personâ risus est. The sleeping of an heir is laughter under a mask

Haud facile emergunt quorum virtutibus obstat res angusta domi. They will not easily rise in the world, whose talents are depressed by poverty

Haud passibus æquis. With unequal steps
Hæu! quam difficile est crimen non prodere vitæ! How difficult a matter it is not to betray guilt by the countenance!

Hic est, aut nusquam, quod quarimus. Here, or no where, is the object of our search

Hic murus alienus esto, nil conscire sibi, nullâ pallescere culpâ. Let this be thy brazen wall of defence, to be conscious of no crime, and to turn pale at no accusation [open for genius

Hic patet ingenii campus. Here is a field

Hinc illæ lachrymæ. Hence proceed these

Hoc æge. Do this [tears

Homini errare, insipientis vero in errore perseverare. Any man may err, but a fool only will persevere in error

Homo sum; humani nihil a me alienum puto. I am a man, and deem nothing which relates to a man foreign to my feelings

Honesta quadam scelera successus facit. Success makes some sorts of wickedness appear honourable

Honos alit artes. Honour fosters the arts

Hortus siccus. A collection of the leaves of plants in a dried state

IDEM sonans. Sounding alike

Id est (i. e.) That is [scription

Id genus omne. All persons of that design

Ignoti nulla cupido. No desire is felt of a

illa dolet vere que sine teste dolet. Her grief, who grieves unseen, is sincere

Ille crucem sceleris prethum, hic diadema. One man is crucified for a crime which raises another to a throne

Ille potens sui lætusque degit, cui licet in diem dixisse, *Vixi.* That man lives happily, and in full control over himself, who from day to day can say, *I have lived*

Imitatores, servum pecus! Ye imitators, a servile herd!

Impertum, flagitio acquisitum, nemo unquam bonis artibus exercuit. The power criminally acquired is never beneficially exercised [a government

Impertium in imperio. A government within

Impromptum. Let it be printed

Improbis aliena virtus semper formidolosa est. To the wicked the virtues of other men are always an object of terror

Impromptu. Without study

Incidit in Scyllam qui vult vitare Charybdim. In attempting to avoid a lesser, he falls into a greater evil

Incoctum generoso pectus honesto. A mind imbued with generous and honourable qualities [dation

In commendam. In trust or recommendation

Index expurgatorius. A purifying index

Indocti discant, et ament meminisse periti. Let the unskilful learn, and the learned improve their recollection

In esse; in posse. In being; possible. (Logical expressions)

Inest sua gratia parvis. Little things have their own peculiar grace

In formâ pauperis. In the form of a poor man [of conscience

In foro conscientie. Before the tribunal

Iniquissimam pacem justissimo bello antelero. I prefer the most disadvantageous peace to the justest war. (The favourite maxim of Fox)

Ingenio stat sine morte decus. The honours of genius are eternal

Innuendo. An oblique hint or insinuation

In propria personâ. In person

In puris naturalibus. Stark naked

In re. In the matter of

Insanus omnis furere credit cæteros. Every madman believes that all other persons are mad

Instar omnium. One example may suffice

Inter nos. Between ourselves [for all

In terrorem. In terror.

In transitu. In passing

Intuta que indecora. Those things which are disgraceful are unsafe

Invidiam placare paras virtute relicta. To shun detraction would you fly from virtue

In vino veritas. There is truth in wine

Invidiâ Minervâ. Without the aid of genius

Ipse dixit. He himself said it: dogmatism

Ipso facto—jure. In the fact itself—by the law itself

Iras et verba locant. They hire out their passions and their words. (Spoken of lawyers)

Iter pigrorum quasi sepes spinarum. The way of the sluggard is as a hedge of thorns

JACTA est alea. The die is cast

Jactitatio. Boasting; also, in law, jactitation of marriage, &c.

Januis clausis. With shut doors [sant

Jucundi acti labores. Past labours are pleasant

Judex damnatur cum nocens absolvitur. Guilt attaches to a judge when the guilty are suffered to escape [man law

Jure divino—humano. By divine—by human

Jus civile—gentium. The civil law—the law of nations

Justitiæ partes sunt non violare homines; verecundie non offendere. Justice consists in doing men no injury; decency in giving them no offence

Juvenile vitium regere non posse impetum. It is the fault of youth that it cannot govern its own violence

LABITUR et labetur in omne volubillis ævum. The river runs now, and will continue to run through every succeeding age

Labor omnia vincit. Labour conquers every thing [of our labours

Laborum dulce lenimen. The sweet solace

Lætus sum laudari a te viro laudato. It gives me pleasure to be praised by you, the object of so much praise

Lapsus lingue. A slip of the tongue

Latet anguis in herbâ. There is a snake in the grass

Latitat. He lurks; summons, by which the defendant is feigned to be concealed

Laudator temporis acti. A praiser of past things

Laudibus arguitur vini vinosus. A drunkard is discovered by the praises he bestows on wine

Leve fit quod bene fertur onus. That load which is cheerfully borne becomes pleasant

Proverbs, Terms, and Phrases.

Lex non scripta—scripta. The common—the statute law [the law of the land]
 Lex talionis—terreæ. The law of retaliation—
 Litera scripta manet. The written letter
 remansit
 Locum tenens. A deputy or substitute
 Locus criminis. The place where a crime
 has been committed
 Locus sigilli (L.S.) The place of the seal
 Longa est injuria, longæ ambages. The in-
 jury is great, and the story long
 Longum est iter per præcepta, breve et effi-
 cax per exempla. Instruction by precept is
 tedious, by example short and effectual
 Lucri bonus odor ex qualibet re. The smell
 of gain is good, whencesoever it proceeds
MAGNA CHARTA. The Great Charter.
 Magna est veritas et prævalebit. The
 truth is powerful, and will ultimately
 prevail [great name]
 Magni nominis umbra. The shadow of a
 Magnum est vectigal parsimonia. Economy
 is itself a great income
 Maledicus a malefico non distat nisi occa-
 sione. The slanderer differs from the evil-
 doer only in the want of opportunity
 Malè parva malè dilabuntur. Things ill-
 gotten are as badly expended
 Malum in se—malum prohibitum. An evil in
 itself—a thing evil because forbidden
 Mars gravior sub pace latet. A more se-
 vere war lurks under the show of peace
 Materlem superabat opus. The workman-
 ship surpassed the materials
 Maximus in minimis. Very great in very
 trifling things [be the safest]
 Medio tutissimus ibis. A medium course will
 Memento mori. Remember death
 Memorabilia. Things to be remembered
 Mens sibi conscia recti. A mind conscious
 in itself of rectitude
 Mens agitat molem. Mind informs the mass
 Minutiæ. Trifles; minute parts
 Mirabile dictu. Wonderful to tell
 Miseris succurrere disco. I learn to relieve
 the wretched
 Miserum est aliorum incumbere famæ. It
 is a wretched thing to depend on the
 fame of others [offender to prison]
 Mittimus. We send; a writ to commit an
 Mollia tempora fandi. The favourable mo-
 ments for speaking
 Monstrum nullâ virtute redemptum a vitis.
 A monster whose vices are not counter-
 balanced by a single virtue
 Mors omnibus communis. Death is common
 Multa gemens. Groaning deeply [to all]
 Multum in parvo. Much in little
 Munus Apolline dignum. An offering wor-
 thy of Apollo [cessary changes]
 Mutatis mutandis. After making the ne-
 cessary changes, de te fabula narratur.
 Change the name, and the story will ap-
 ply to yourself [poem without words]
 Mutum est pictura poema. A picture is a
 dumb poem
NAM vitis nemo sine nascitur. No man
 is born without faults [pany of players]
 Natio comæda est. The nation is a com-
 edy
 Naturam expellas furcâ, tamen usque re-
 curret. You may attempt to drive away
 nature by violence, but she will still return
 Ne cede malis. Do not yield to misfortune
 Necesse est ut multos timeant, quem multi
 timeant. They whom many dread, must
 live in terror of many

Necessitas non habet leges. Necessity has
 no law [to know all things]
 Nec scire fas est omnia. It is not permitted
 Nec vixit malè qui natus moriensque fe-
 licit. Nor has he spent his life badly,
 who, from the cradle to the grave, hath
 passed it in privacy
 Nem. con. Abbreviation for *nemine con-
 tradicente*. Nem. dis. Abbreviation for
nemine dissentiente. Without opposition.
 The former is used in the House of Com-
 mons; the latter in the House of Peers,
 to express concurrence
 Nemo mortalium omnibus horis sapit. No
 man is wise at all times
 Nemo repente fuit turpissimus. No man
 ever became incurably vicious at once
 Ne plus ultra. Nothing beyond—the ut-
 most point [the hand of a boy]
 Ne puerio gladium. Trust not a sword to
 Neque semper arcum tendit Apollo. Apollo
 does not always bend his bow
 Ne quid nimis. Too much of one thing is
 good for nothing
 Nescit vox missa reverti. A word once ut-
 tered can never be recalled
 Ne sutor ultra crepidam. Let not the shoemaker
 go beyond his last
 Nihil legebat quod non exciperet. He
 picked something out of every thing he read
 Nihil tam absurdum, quod non dictum sit
 ab aliquo philosophorum. There is no
 absurdity which has not been maintained
 by some philosopher
 Nil conscire sibi, nullâ pallescere cupa-
 To be conscious of no crime, and to turn
 pale at no accusation
 Nil fuit unquam tam dispar sibi. Nothing
 was ever so unlike itself
 Nisi Dominus frustra. Unless the Lord as-
 sist you, all your efforts are vain
 Nisi prius. Unless before; a writ by which
 the sheriff is to bring a jury to Westmin-
 ster Hall on a certain day, "unless be-
 fore" that the Lords Justices go into his
 county to hold assizes
 Noctæ empta dolore voluptas. Pleasure,
 bought at the expense of pain, is injurious
 Nolle prosequi. To be unwilling to pro-
 ceed.—This is used when a plaintiff,
 having commenced an action, declines to
 proceed therein [a bishop]
 Nolo episcopari. I do not wish to be made
 Nomen stultorum semper parietibus hæret.
 He is a fool, and ever shall, who writes
 his name upon a wall
 Non assumpsit. He did not assume.—A
 plea in personal actions, when the de-
 fendant denies that any promise was made
 Non constat. It does not appear
 Non ego ventosæ venor suffragia plebis.
 I do not hunt for the votes of the in-
 constant rabble
 Non est vivere, sed valere vita. Life con-
 sists not in mere existence, but in the well-
 spending of our time
 Non fumum ex fulgore sed ex fumo dare
 lucem. Not to elicit smoke from splen-
 dour, but splendour from smoke—
 Non gratiis hostes. No thanks to enemies
 Non nostrum tantas componere lites. It is
 not for us to adjust such grave disputes
 Non obstante. Notwithstanding; a dis-
 pensing power in patents
 Non omnia possumus omnes. We cannot
 all of us do every thing

Proverbs, Terms, and Phrases.

Noscitur ex sociis. He is known by his company.
Nota Bene (N.B.) Mark well [panious]
Nudum pactum. A naked agreement
Nulla venenato litera mista joco est. My paper is free from any envenomed jest
Nullius addictus jurare in verba magistri. Being bound to swear to the dogmas of no master
Nullum numen abest, si sit prudentia. Possessed of prudence, no protecting divinity is wanting
Nullum tempus occurrit regi. No time impedes the king
Nunquam aliud natura, aliud sapientia dicit. Nature and sound philosophy are one at variance
Nunquam libertas gratior extat quam sub rege pio. Liberty is never more grateful than under a patriotic king
Nunquam non paratus. Always ready
Nusquam tuta fides. Our confidence is nowhere safe

OBITER dictum. A thing said by the way, or in passing [In dark terms]
Obscuris vera involvens. Involving truth Obscurum per obscurius. Explaining something obscure by what is more obscure
Obsequium amicos, veritas odium parit. Obsequiousness procures friends, truth hatred
Occupet extremum scabies. The devil take the hindmost [ylded they fear]
Oderint dum metuant. Let them hate, prodi profanum vulgus, et arceo. I loathe and repulse the profane vulgar
Odium theologicum. A theological hatred
Omne solum forti patria. To a brave man every soil is his country
Onus probandi. The weight of proof; the burden of proving
Opera pretium est. It is worth while
Opinionum commenta delet dies, naturæ judicium confirmat. Time obliterates speculative opinions, but confirms the judgments of nature [the faculty]
Opprobrium medicorum. The reproach of
Orator fit, poeta nascitur. Oratory may be acquired, but a poet must be born a poet
O! si sic omnia. O! that he had always done, or spoken thus [manners]
O tempora, O mores! O the times, O the Otium cum dignitate—sine dignitate.
 Ease with—without dignity

PABULUM Acheronis. Food for the churchyard [won bear the pain]
Palmam qui meruit ferat. Let him who has Parli passu. By a similar gradation
Par nobile fratrum. (Ironically.) A noble pair of brothers
Par pari referro. I return like for like
Pars minima sul. The frittered remnant of the man or thing
Parthi quo plus bibunt, eo plus sitiunt. Ever drunk, ever dry
Parthis mendacior. A greater liar than a Parthian

A NEW AND ENLARGED Dictionary of the English Language, WITH MORAL MAXIMS, ALPHABETICALLY ARRANGED.

ABB

ABJ

A, THE first letter of the alphabet, is an article set before nouns of the singular number: as, a man, a tree. Before a word beginning with a vowel, it is written *an*; as *an ox*. It is placed before a participle, or participial noun; as, a hunting, a begging. It denotes proportion; the schoolmaster hath a hundred a year. It is used as an abbreviation of certain Latin words; as *A. M.* artium magister; *A. D.* anno domini. *A* has three different sounds: the broad sound, as *all*, *scall*; the open, as *father*, *rather*; and the slender, or close, as *place*, *face*, *vest*.
Aaronic, *Aaronical*, *a.* belonging or relating to the priesthood of Aaron
